## Separatism Boiling Up Into Fracas

By JOHN MIKA  
Legislative Reporter

The burgeoning debate over the provincial cabinet's attitude towards Confederation is expected to grow more heated today with the soft-spoken echo of the word "treasonable" still in the air.

The controversy, rapidly escalating into a dominant argument of the session, was intensified Monday as Alan Macfarlane (L-Oak Bay) demanded the government stop its kite-flying and reveal its "reasons for throwing up this incredible smokescreen of separation."

Then he touched off a brief outburst while winding up the budget debate for the Liberal party.

"To treat the threats seriously would be to accept the fact that this government is guilty of treasonable motives, a lack of patriotism, and of a desire to divide Canada and fracture Confederation," he said.

A chorus of "absolute nonsense" and "ridiculous" burst from the Sacred benches.

### Daily Doses

"I agree it's nonsense," he shouted back, "but it has been spoken by your premier and by your cabinet and we've been getting this absolute nonsense every day."

Premier Bennett's spending estimates—including his salary vote which is the traditional juncture of opposition members to zero in on his policies—is slated to come up at today's sitting.

There were suggestions Monday night that the demand for a government statement on reasons for it will be continued by the opposition.

### Very Shallow

Snapping back at laughter greeting his speech, Mr. Macfarlane said Sacred backbenchers were "very shallow if they don't think this subject is serious."

"Are these fellows," he said pointing at the backbenchers, "going to ride out of Confederation on the coattails of the premier as they rode in office?"

John Tisdale (SC-Saanich-The Islands) interjected "we'll ride a Liberal jackass."

"I'll pay no attention to the bray from Saanich and The Islands."

Mr. Macfarlane said he preferred to believe that the government's motives were political bluffing to divert attention from its own failings.

### Playing Politics

"Because I have to have some faith in the sanity of this government, I find it difficult to avoid the irresistible conclusion that this government is playing politics when it should be promoting patriotism," he said.

Russell said the furor caused by CIA's involvement with the national student association and other non-government groups is totally committed to the cost of the two power projects that they have to find a whipping boy to blame for the lack of progress.

### WIRE BRIEFS

#### Viet Talks Planned

LONDON (UPI)—Polish foreign minister Adam Rapacki arrives today for a week of talks with British leaders. Informed sources said the British may use them for new sounding on peace prospects in Viet Nam.

#### Trial Rules Hit

PEORIA, Ill. (UPI)—The Illinois supreme court was asked today to declare unconstitutional some of the stringent restrictions on news coverage of the trial of accused mass killer Richard Speck. (See story Page 24.)

#### Freighter, Tug Collide

PORTSMOUTH, Va. (AP)—The Greek freighter Hellene Halycon and an ocean-going tug towing an oil barge collided in dense fog early today on Chesapeake Bay. The captain and crew members of the tug were injured but the U.S. Coast Guard here indicated the collision was not serious.

#### Wildcat Strike

MANSFIELD, Ohio (AP)—Court action continued today in efforts to halt a wildcat strike of 2,650 United Auto Workers which threatens to make idle 80,000 by Friday. Some 12,000 Canadian workers would be affected.

#### 5 Die in Fire

BLENHEIM, Ont. (CP)—Four sisters and their great-grandfather died early today in a fire that swept through their two-story frame home in this town 10 miles south of Chatham. The dead are Barney Harris, 85, Susan Lindsay, 12, and her sisters Vera, 9, Roberta, 6, and Crystal Belle, 4.

#### Trial for Sukarno

SINGAPORE (UPI)—Radio Jakarta announced today that President Sukarno will be brought to trial for moral and economic "deviations" committed while in power.

## CS Strike Rights Given Approval

### FINE, CENSURE RECOMMENDED FOR POWELL

WASHINGTON (UPI)—

House Republicans, who previously voted unanimously to unseat Adam Clayton Powell, today approved a special plan to return him to Congress under stiff censure and docked pay. But Rep. Claude Pepper, D-Fla., member of the select house committee which must make the final recommendation on seating the Harlem Democrat, said he was holding out for re-appointing Powell, thus expelling him from the House.

Greatest change embodied in the three bills affecting some 200,000 government employees is a provision for collective bargaining with the optional right to strike.

The bills do three things:

Establish a bargaining system;

rework the Civil Service Act in

keeping with the bargaining

system and modernize it to set

out new conditions of employ

ment in areas such as political

freedom, and amend the Finan

cial Administration Act to

set out the treasury board's new

role as management in the bar

gaining system.

**ROLE CHANGES**

The role of the civil service

commission—renamed the pub

lic service commission—as the

independent agency responsible

for recruitment, promotion

classification and the body

that recommends salary and

wage levels, changes drasti

cally.

It retains its recruitment and

promotion role but loses the

other functions in whole or in

part.

The treasury board, a cabinet

committee headed by Revenue

Minister Benson as president,

assumes the role of manage

ment in bargaining and takes

on the task of classifying a

job's worth. Salaries become

the subject of bargaining.

The number of employees af

fected by the new system jumps

from 200,000 from less than 150,000

under present provisions of the

Civil Service Act with inclusion

of some 50,000 hourly rated

employees.

These employees had been

subject to appointment by pa

ntrone. Now, through delega

tion of hiring authority by the

ntronage appointments between

1957 and 1963 when he was a

minister. Although welcoming

an end to patronage he urged

the commission not to apply

"the coldness of paper" to the

task.

He hoped ministers would not

bring pressures on their depu

**ALLEGED MISCONDUCT**

# Judge Quits Inquiry, Asks Trial by Court

By RONALD LEBEL

OTTAWA (CP) — A parliamentary inquiry into the alleged misconduct of Mr. Justice Leo Landreville broke up abruptly Monday night after the judge objected strongly to the procedure and walked out.

The Ontario Supreme Court judge, who faces an unprecedented impeachment, challenged the validity of the inquiry and called for a trial before the Supreme Court of Canada.

The special Commons-Senate committee, stunned by the walkout, adjourned in confusion at 9 p.m. EST before its inquiry could start.

A meeting was scheduled for Thursday to consider the judge's seven "preliminary objections" and a rebuttal by Maurice Allivier, parliamentary law clerk, and Committee Counsel Yves Fortier.

Committee Co-Chairman Ovide Lafleur (L—Quebec-Montmorency) told a reporter he expects the committee will wind up its work within three weeks. No witnesses are expected to be called.

**SOME AGREE**

Some of the 12 MPs and six senators on the committee said they agreed with the judge's objections, while others poked fun at his "theatrics."

Mr. Lafleur, the two parliamentary lawyers and other committee members replied that the committee has been instructed by both houses of Parliament to review the findings of a judicial inquiry conducted last year by Ivan C.

## Housewives Plan March Of Protest

TORONTO (CP) — A housewives group plans a march on the Ontario legislature Feb. 27 demanding legislation to forbid discrimination by landlords against families with children.

Mrs. Jacqueline Shepherd, chairman of the Consumer Housewives' Union, said Monday her group will demand an addition to the Ontario Human Rights Code to this effect.

"It is already unlawful to discriminate against persons because of their race, color, religious belief or where they were born. But landlords shut the door on children. Aren't children people?" she said in an interview.

Mrs. Shepherd, mother of five, said she and her husband Jack "went through hell" trying to find a home until they were allotted an Ontario Housing Corp. house.

She said she recently received 500 replies to a classified advertisement asking for letters from persons who were having difficulty renting a house or apartment because they had children.

Forty per cent of the answers came from persons who could afford to pay rents advertised but were refused accommodation because of their children.

## Retired Minister 'Baron' Heneage Dies at Vancouver

VANCOUVER (CP) — Reverend Thomas R. Heneage, 90, a retired Anglican minister who inherited the title of baron with his family's estate in England in 1954, died in hospital Sunday of malnutrition and dehydration.

Mr. Heneage died three days after being found collapsed in the bathroom of his apartment suite. It is believed the elderly clergyman spent three days in the bathroom after accidentally locking himself in.

Mr. Heneage was born in England and graduated from Cambridge University. He emigrated to Canada in 1906 and was the rector of St. Mark's Church at Victoria from 1909 to 1912 and chaplain of the Bishop of British Columbia until 1917.

He returned to England in 1922 for the funeral of his father who was created Baron Heneage of Hainton, Lincoln, June 8, 1896, for outstanding public services. Mr. Heneage died as a minister in 1949.

## DOUBLE YOUR INTEREST ON SAVINGS — SAFELY

Why be content with 3% or 3½% interest on your savings when you can earn 7% compounded semi-annually. Investments of \$500 or more are withdrawable anytime and are secured by first mortgages only, registered in investor's name at Government Land Registry offices. There is no safer investment than a first mortgage and no other company provides the added security of government registered mortgage assignments to individual investors.

LANDREVILLE

The judge, who will be 57 Thursday, told reporters later he is being singled out because he is the only French-Canadian among 32 judges on the Ontario Supreme Court and because he is a former Liberal politician.

He was asked what he hoped to achieve by walking out of the parliamentary inquiry.

**SEEKS TRIAL**

"A trial," he replied, "where I'll have specific charges to deal with. I will not go on banting ghosts as I have been doing for five years."

Judges could not be impeached except for very serious offences. "I made \$117,000—that's my offence."

In his eight-page statement to the committee, the judge said the Rand inquiry was illegal and should form no part of new hearings. The Inquiries Act did not apply to judges and he had not been given the required notice that he would be charged with misconduct.

He also objected to the committee's previous decisions against calling any witnesses of its own, to adopt in its records a report by the Law Society of Ontario calling for his removal and a gainst submitting different reports to the Commons and Senate.

He said his case is unprecedented in Canadian history and should be heard by the Supreme Court of Canada on a reference from the cabinet.

Mr. Lafleur and the two parliamentary counsels were due to meet today to prepare recommendations to submit to the committee Thursday.

## FOOD STRIKE NEARING BIRTHDAY

KINGSTON, Ont. (CP) — A hunger strike by two Sons of Freedom Doukhobor women from British Columbia in the prison for women here is approaching its first anniversary.

Mary Malakoff and Mary Astaforoff, both in their mid-twenties, started the fast last April 3 to protest five-year prison sentences for arson. They were sentenced in September, 1965.

Acting prison superintendent Donald Clark said today the women are still being fed a liquid diet through nasal tubes.

They returned to the prison hospital ward last Jan. 23 following a seven-month stay in the nearby Canadian Forces Hospital when doctors decided the women no longer needed intensive treatment.

They seldom have visitors. It is the final analysis perhaps integration is the wrong word altogether and it is "unification" of which we should speak—one force with many facets operating at the will of one commander in the fulfillment of one national defence policy."

## CANADA'S DEFENCE COMMITMENTS

# Unification 'Kiss of Death'?

By DAVE McINTOSH

OTTAWA (CP)—Lt.-Gen. Robert W. Moncel, vice-chief of the defence staff when he resigned last July at the age of 49, said Monday armed forces unification may be the "kiss of death" for Canada's defence commitments.

He told the Commons defence committee in 4½ hours of testimony that unification will work only if defence commitments are reduced or changed.

The role of the armed forces could have been changed "to make unification fit like a glove without all this nonsense and trouble," he maintained.

Gen. Moncel said he resigned last summer, though offered the job of commander of the new Mobile Command, because unification was an "uncharted course" with a "dim destination." He had not been due for retirement until 1972.

He said Defence Minister Hellyer genuinely believed in unification was the right thing and "if you didn't believe this was the right thing, then you were stupid."

Mary Malakoff and Mary Astaforoff, both in their mid-twenties, started the fast last April 3 to protest five-year prison sentences for arson. They were sentenced in September, 1965.

Acting prison superintendent Donald Clark said today the women are still being fed a liquid diet through nasal tubes.

They returned to the prison hospital ward last Jan. 23 following a seven-month stay in the nearby Canadian Forces Hospital when doctors decided the women no longer needed intensive treatment.

They seldom have visitors. It is the final analysis perhaps integration is the wrong word altogether and it is "unification" of which we should speak—one force with many facets operating at the will of one commander in the fulfillment of one national defence policy."

Gen. Moncel said he still agrees with that. But there was no unification plan and, as far as he knew, there was still none.

"Unification has become unification for unification's sake," he said.

**COULD SEE MINISTER**

Gen. Moncel said that after three meetings, he tried at least 20 times to see Mr. Hellyer again. But the staff had never met again on unification while he was vice-chief.

The thought that these two men now are mucking around with a farm and lobster traps fills me with despair," he added.

Gen. Moncel, now seconded to Prime Minister Pearson's office for Centennial duties, was

speaking for the first time publicly since he retired in the headquarter up here last summer which saw a wholesale change in the top command of the armed forces.

"Fortunately, nothing was done about it."

He also said it had cost the taxpayers millions of dollars to train men like Rear-Admirals William Landymore and Jeffery Brock, both fired by Mr. Hellyer.

The thought that these two men now are mucking around with a farm and lobster traps fills me with despair," he added.

Gen. Moncel, now seconded to Prime Minister Pearson's office for Centennial duties, was

## Response in the Schools

**A**MONG THE SIGNIFICANT statistics presented by Mr. Leslie Peterson in his review of provincial education in the budget debate were figures showing the degree to which most British Columbia children are advancing to the final year of high school.

This, the retention rate, was listed in 1966 as 75 per cent of the original elementary population. Three out of four children are reaching the stage of education which only one out of two reached 15 years ago.

These figures give British Columbia an impressive position throughout Canada. Presumably they show an appreciation for the fact that modern living calls for more advanced education and a recognition of the fact that the dropout pupil faces immediate difficulties in a world where the good jobs demand at least secondary schooling.

This does not mean that three out of four students in our general school system are heading for university—though an increasing number are. Alternative forms of training or education are being provided for those not inclined to the advanced formal academic program.

This development is accompanied by another promising trend. While regular students are spending more time in class—including post-secondary education of various types—a growing number of adults are resuming interrupted education. The latter movement seems based on the same appreciation: the need for a better education to meet today's problems.

Those problems, of course, are not concerned merely with job

training. There is a need, and a growing public demand, for wider knowledge of a world that is increasing in complexity more rapidly than we can understand it. The vast machine that the globe has become must be mastered by man—he must learn how to operate and improve it; how to withstand the tensions it generates, how to preserve in it the basic requirements of mankind for recreation, character development and pleasant living. The key to the new environment is knowledge, understanding and intellectual adaptability, and these must be gained through study.

The picture adds up to this: more people are attending classes longer. That obviously means that more accommodation is needed. What is the government doing about this new educational situation that has developed so rapidly? It is responding with alarming slowness.

School boards still must fight for every dollar for classrooms and frequently run a year or more behind in their requirements. The universities, recipients of increasing numbers of students each year from the high school stream, are likewise kept pressed for funds and their enrolments far outstrip the earlier estimates on which their building programs were laid down by the government. The new technical schools are already crowded.

If our young people are answering the demand for better education, it should be a top priority of government to see that adequate funds are made available for adequate facilities—come Hydro or high water.

## To Be Backed by Money

**M**R. SINCLAIR STEVENS HAS stepped down gracefully from his position as chairman of the Bank of Western Canada, leaving Mr. James Coyne in charge as president with full powers, apparently, to create the type of financial institution which will best suit the needs of the area it proposes to serve.

This is a happier outcome than might have been expected when Mr. Coyne first aired his charges that the bank was dominated too much by eastern financial interests which were seeking to benefit from an alliance with the bank by using it as a source of funds for other enterprises. But before Westbank can be considered to be properly on its feet, strong western financial backing is necessary. Mr. Stevens' group, which controls 52 per cent

of the shares, has indicated its willingness to sell a "substantial" portion and it would seem to be up to Mr. Coyne and the western directors of the bank to convince potential investors that the venture is worthwhile.

Since British Columbia is shortly to have a newly-chartered bank with headquarters in Vancouver, it seems unlikely that much support for Mr. Coyne's organization will be found in this province. But it would be astonishing if there were not in the now-wealthy prairie provinces enough investors to subscribe the \$2 millions to \$3 millions which are needed to establish western control. After complaining for years about the dominance of eastern financiers over their economy, prairie people should have the imagination and courage to support their own bank.

## Aesthetics and Power

**I**T MAY COME AS A SURPRISE to power-oriented members of British Columbia's government, but a recent movement in the United States points up the fact that conservationists can exert a heavy influence for aesthetics against dam building even in thirsty Arizona.

The United States department of the Interior recently advanced a new proposal for developing the Colorado River water resources without building suggested dams. Thereby threats to the scenic beauty of the Grand Canyon would be removed.

## 'Nulli Secundus'

**B**RITISH COLUMBIANS MAY take heart from the assessment by Mr. Leslie Peterson of the educational standard maintained in this province despite difficulties of higher costs, tight money and what he calls the "abrupt and unilateral cancellation of federal-provincial cost-sharing agreements by the Liberal government in Ottawa."

"Nevertheless," says Mr. Peter-

son, "we have fulfilled our obliga-

tions to the people of this province by giving them an over-all educational complex second to none and we will, somehow, continue to do so."

It might have been more seemly had the assessment come from some outside source. It is, however, a claim which not more than nine other provincial ministers of education are likely to make to their respective provinces in this country.

"All I told them was . . . any volunteers for my job take one step forward . . . and that was the last I knew . . ."

## FROM OTTAWA

### 'Whatever Rates, Debt Is a Burden'

**T**HE special joint committee on consumer credit is so obviously and enthusiastically on the side of the angels that its periodic reports appear to be

receiving a rapturous and generally uncritical reception both from Parliament and the press. Many of the recommendations do seem to be very useful. For example, it is surely time to extend services (including professional sports) to the provisions of the Combinations Investigation Act. The industry with which the committee is chiefly and properly concerned is the sales finance industry.

It is not clear, however, that all the ideas of the committee are equally sound. Another point worth noting is that the members are conveniently dodging a major difficulty and may, for that reason, be arousing hopes not likely to be fulfilled. They have taken the easy way by announcing that they are all for the consumers, God bless them, and it is for "the appropriate governments and legislatures to work out co-operatively the means of achieving the desired ends."

Thus we learn from the latest report that the financing of used cars has become a social problem. Most of us probably will accept this without argument. To deal with the problem the committee wants a central registry of all cars to be established in each province and it recommends a maximum rate, fixed by law, and including all charges, for the financing of used cars.

The first recommendation is clearly meant for the provinces and the second might conceivably involve some difficulties. On the other hand, it would be quite open to the committee to call for action on behalf of consumers which is unquestionably within federal jurisdiction and would require no consultation whatsoever with the provinces.

One of the problems, at the moment, is that a used car for purposes of the customs department is prohibited good. There are some tricky definitions; it may be imported at the moment if it is a 1967 model. But how many used car purchasers can afford 1967 models (with the tariff and extras added or even without)?

Across our border, however, is the largest used car market in the world. If the committee is sincerely desirous of helping needy purchasers, it should recommend that the government stop treating used cars on the same basis as heroin. This almost certain would lower Canadian prices.

The committee is troubled, as it should be, because too many of us are too deeply in debt. At the end of 1965 we

owed sales finance companies \$1,140,000,000. How improvident we are shown by the fact that \$900 million of this was in automobiles, the world's worst investment.

There is an unhappy probability, however, that the committee's most lauded plan would land even more of us in debt. The general idea is that a means test should be applied to interest rates. People below a certain level (\$4,000) would qualify for lower rates established through government guarantees. These would be for consumer loans for "provident and productive purposes related to the preservation of home and family."

This is a most attractive "war on poverty" concept. No doubt there are many very deserving people who have difficulty in obtaining needed credit. But there are others who might be even less happy if they were enabled and encouraged to get it. Even with comparatively low interest rates, debt is a burden.

Furthermore, there would certainly be many difficulties in practice. Some body would have to decide what is "provident."

It is important also to consider the long term implications of such a plan. Any income qualification is bound to be arbitrary; a person with an income of \$4,500 may be little better off (in some circumstances worse off) than another

who can squeeze under the ceiling and thus qualify for a government-guaranteed low interest loan.

Within a very short time, there would be political pressure to raise the ceiling, perhaps we would end up with a sliding scale of interest rates with everyone paying according to his income.

There could easily be a situation also, in which the Bank of Canada was trying to restrain credit buying at the very time when the government through such legislation was stimulating it.

The committee, speaking of its plan, remarks: "Experience suggests that the risk of losses would be small." What experience? Up to now we have not had means test interest rates. The statistics noted in the report are naturally reassuring because they cover the whole experience with consumer loans. But there must be some inverse relationship between risk and income. Obviously a person with \$4,000 is more likely to get into trouble over payments than one with \$10,000; he has very little margin on which to work. The committee, in effect, confines itself to the high risks and then discards through "experience" that they do not exist.

There are still a few old-fashioned people who find wisdom in Mr. Micawber's famous thoughts on the subject of income and expenditures. None of them serve on the joint committee.

## FROM WASHINGTON

### A Time to Discard Deceit

**T**HE noises you hear around the CIA announce the Big Thaw, which has been underway in Europe for several years, and has now reached America.

The ice of the cold war is breaking up, and, as the climate is changing, the landscape is changing too. The older and more permanent features of the American scene are reappearing. Thus, only a year ago in April,

1966, the New York Times published a series of articles on the CIA.

They exposed more systematically than Ramparts magazine has today the elaborate infiltration of American institutions by the CIA. Yet there was no general outcry.

Now there is a tremendous outcry and the CIA operation has begun to smell like a backed up cesspool. This proves that it isn't the activities of the CIA which have changed. What has changed

is the public attitude about it.

A year ago this preponderant mass of Americans still felt that they were at war—a cold war if possible, but a nuclear war quite possibly. This is no longer the prevailing American opinion. The same revolution of opinion which has changed the policy of European governments in the early sixties is now taking place here. The gap which has existed for some years between European and American thinking, the gap which has caused so much misunderstanding and dislike, is closing. In Europe this phenomenon manifested itself in an almost total loss of interest in NATO and the other institutions of the cold war. Here the change first manifested itself in our acceptance of the changes in Europe, it manifested itself today in a revolution against the enormity of the corruption which has resulted from the cold war.

During War

The enormity of the corruption stems from the secret use of government funds to deceive the world—to deceive the Communists, to deceive our friends and allies, and to deceive ourselves. It is said that the Soviet Union had paid propagandists masquerading as students, scholars, journalists, trade unionists, and that therefore, we had to give subsidies so that our students could confront the Communists. We had to fight fire with fire. We must remember today that we were then at war and that all is fair in love and in war.

This is plausible enough. But the event shows that something is wrong with the argument. The event shows that, while a free country like the United States can, if it is sufficiently frightened, imitate the methods of a totalitarian state, once the fear is relaxed, the more enduring tradition and spirit cannot be kept down. In the last analysis a free system like the American can be manipulated only if there is enough panic and fear. The old and real character of the people will not stay suppressed. This is one of the characteristics of a people who have been habituated to freedom so long that it is part of their very nature.

At one time it was feared that the efficiency of the various defences at Esquimalt might be impaired by the transfer of the Canadian authorities.

What has happened in this affair is different from the business of spying which is an indispensable part of the rivalry of armed powers. The payments to students, scholars, journalists, has had very little if anything to do with true intelligence work, with penetrating the

## Letters

Letters will be considered for publication only if the writer is clearly identified to the editor, who may permit pen names at his discretion. Submissions will be edited and may be condensed. Short letters are favored. None will be returned.

### Innuendo

Mr. Waldo Skillings' congratulation of Dr. Malcolm Taylor on "protecting the morals of university students" can only be taken as innuendo on the integrity of the very able university staff members whose contracts are not being renewed. This deliberate insinuation is despicable!

I am not surprised that Mr. Skillings is against those who help American "draft-dodgers." He would not understand the agony decent young Americans feel when their country orders them to fight in a war they personally believe to be unjust, and perhaps even criminal.

It is moreover, stupid, it seems to me, to attack as a "lame duck" an official like Dr. J. B. Macdonald for doing his duty as he sees it. If the president of a university does not tell the government and the public how much money is needed, who will? It is, of course, the legislature which must finally decide how much money will be spent in each field. And I hope the people of B.C. hold the majority party in this legislature responsible for the miserly way it is treating education.—David P. Reimer, 1 Briar Place.

### An Apple for the Princess

Victoria city taxpayers will heartily endorse Alderman Percy Frampton's words of wisdom about the extravagance and, indeed, bad taste in offering a very costly gift to passing royalty. A gift is not to be measured by its high cost (though the mercenary do exactly that) but by the spirit of kindness and goodwill in which it is offered.

Mayor Stephen has repeatedly told us to expect a tax hoist, he certainly is going the right way to achieve such a result. Victoria most urgently needs hospital beds and many other improvements to streets, sewers, etc.

Why not give the Princess a box of delicious B.C. apples? They are said to keep the doctor away.

Talking of city expenditures while City Hall and Centennial Square do seem worth the high expenditure incurred, the same cannot be said about Bastion Square—"Up Dublin."

### Kind to the Blind

May I please say a big "Thank You" to the press, radio, TV, for their most generous publicity during our recent White Cane Week.

We appreciate very much the space and time given on our account.

I wish also to thank the motoring public for its kindness and courtesy not only during White Cane Week, but all the year round, and the general public for assistance to the blind—Elizabeth Watling, president, Victoria White Cane Club.

By WALTER LIPPmann

military secrets of rival powers, of calculating their capabilities and estimating their intentions.

For the present outcry is about the fact that the United States government has compromised professions and institutions on whose purity the hopes of American freedom depends. Why did the CIA, with the full responsibility of the presidents above it, do this? Why did the government not subsidize openly the students and professors who were to go abroad to argue the American case against the Communists?

They did not do it because they believed that deception was a practical necessity. If the students and professors went openly on government expense accounts neutral opinion abroad would no longer have treated them as free men and as essentially different from the paid agents of tyranny. That, however, was not the whole reason for the deception. It was deemed necessary to deceive the Congress of the United States and the American people. For the chosen instrument for exposing the Communists was the non-Communist American left, and it would have been virtually impossible to induce the anti-Communist right, the McCarthyists, Mundis and the like, to appropriate public money for American leftists. Therefore, everybody had to be deceived.

### Soul Searching

As we are recovering our senses, no longer entirely blinded by our fears, we need to examine our consciences and search our souls. We have seen the enormous deception crumble, and the true lesson is the sovereign rule for a people: To yourselves be true. It is not easy to do this when fear and panic are in the air; men are irrational and beside themselves when they are part of a frightened herd.

As we are ourselves again it becomes self-evident that we cannot play international games as if we were a totalitarian society. For the men who carried out the operation—as good men as we have—were not capable of enough deviousness to deceive everyone and enough terrorism to suppress all doubt. The American way of life has plenty of faults. But it does not prepare our whole people for continual deception, and we had better make up our minds to play the game from the American strength and not from American weakness, and to stamp out lying as a public policy.

# Robert Oppenheimer's Tragedy Epitome of the Nuclear Age

By ALFRED FRIENDLY  
The Washington Post

"If the radiance of a thousand suns were to burst into the sky, that would be like the splendor of the Mighty One... I am become Death, the destroyer of worlds."

The words are from the Hindu holy book, the Bhagavad-Gita, and are the ones that Robert Oppenheimer said wrote themselves on his mind when the first atom bomb turned night into day over the New Mexican desert.

He was the creator of the bomb, and in a way it was to destroy his world.

When the story of Los Alamos could be told at the end of the war, the light of Oppenheimer's fame was as bright as his bomb. He was showered with gratitude and acclaim, honored and even revered. He was propelled to positions of vast influence. His status in the world of science was close to oracular.

Nine years later, he was demobilized by official order of his government, acting through the Atomic Energy Commission.

Nine years after that, the Atomic Energy Commission awarded him its highest honor and \$50,000 as a gesture of reparation or maybe contrition. He might have been more pleased with an official validation of a position he took in March, 1954, when his world came down around his ears:

## Hoped To Learn From Errors

"I cannot... accept the suggestion that I am unfit for public service... I have recalled instances where I acted unwisely. What I have hoped for was not that I could wholly avoid error, but that I might learn from it. What I have learned has, I think, made me more fit to serve my country."

But when he died Saturday night, no formal action had been taken to expunge the official mark of "security risk." It is a legitimate question — although it has no answer — to ask how many people ever sincerely believed that he would betray his country's secrets. It is conceivable that more than a corporal's guard believe that now.

His tragedy was close to classical: The towering figure dazzling in triumph, prideful and thereupon shattered. But his destruction was only in part his own doing, and the rest was accomplished less by the gods than by men.

## A Product Of Cold War

His tragedy was also an epitome of the tragedy of the age. It was the product of the Cold War and changed circumstances. Faced for the first time since 1814 with the fact that America could be attacked on its own soil, too many of its people found an answer to their anxiety in branding others as less loyal and patriotic, and an explanation of their dilemma in attributing it to someone's treason.

Rejection of simplistic answers to problems of national security, failure to subscribe to an ordained level of bloody-mindedness, and, too often, mere dissent and non-conformity, could mark a man as a Communist or servant of communism.

In this period, Oppenheimer was the most important figure to be attacked, and one of the last. His case, one can see in hindsight, came as the climax.

His career had two climaxes. One was on July 16, 1945, at Alamogordo, N.M., with the explosion of the world's first fission bomb, the creation of which he directed. The other was on June 1, 1954, when a special security board found him "loyal" but unfit to serve his government or know its future secrets.

## Child Prodigy, Good Boy'

Julius Robert Oppenheimer — "Oppie" to his friends — was born April 22, 1904, the son of a well-to-do Jewish family in New York City. He was a child prodigy, at 11 the youngest member of the New York Mineralogical Society. He remembered himself as "a n u nctuous, repulsively good little boy."

He graduated in three years from Harvard, summa cum laude and Phi Beta Kappa. Postgraduate work in Cambridge and Goettingen followed; then back to Harvard and the California Institute of Technology, and again Europe. He returned to the United States in 1929 and for the next 12 years studied and taught at the California Institute of Technology and the University of California, at Berkeley.

In those days, theoretical physics was almost a European monopoly. Oppenheimer became, if not the founder of the American school, then at least the centre. His own contributions in elementary particles and cosmic rays were brilliant, vastly important and — as is usual with

theoretical physicists — they were made before he became 40.

He was also — as he was one day forced to confess, ashen-faced and hands twisting at his security hearing — "an idiot."

He read happily in seven languages and then took up an eighth, Sanskrit, in order to study books like the Bhagavad-Gita. But he read no newspapers or magazines on current affairs. He had no knowledge of or interest in the news of the day. He had no telephone or radio. He learned of the stock market crash long after the event. He never voted until 1936.

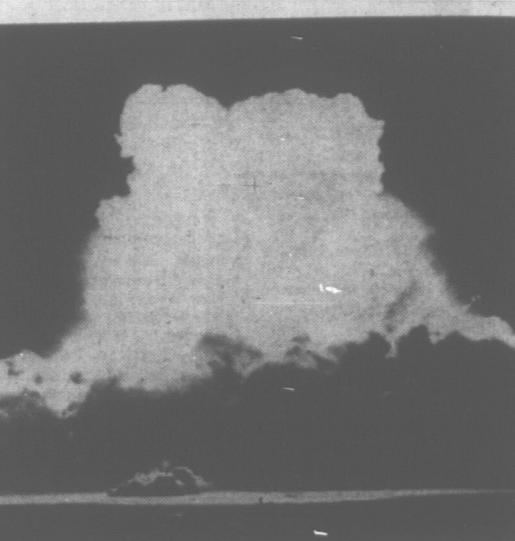

"I had no understanding of the relations of man to his society," he was to plead when his troubles came upon him.

When awareness dawned — through "smoldering fury" at the treatment of the Jews in Germany" and exposure to what the depression was doing to his students — he was a sheep for the shearing.

His associates, even his loves, were Communists. He was never persuaded to become a party member and his

name was a sheep for the shearing.

He received a host of important scientific and governmental assignments. With Dean Acheson and David E. Lilienthal, later to become first chairman of the AEC, he drafted the so-called Baruch Plan for international nuclear control. Almost as a matter of course, he became the first chairman of the new AEC's general advisory committee, the key scientific council of the agency.

The Radiance of a Thousand Suns"

No one who became personally mired in the slough of the Communist environment even emerged completely gracefully, Oppenheimer told a reporter friend in later years. His own exit, he concluded sadly, was not without awkwardness.

After the first A-bomb was exploded, Oppenheimer had said, "Men of our time will never have a sense of security." In a sense quite different from the context of his remark, the statement was terribly true for him, personally. For all that he was lionized and given positions of power after the war, he knew that he lived under a sword of Damocles.

He received a host of important scientific and governmental assignments. With Dean Acheson and David E. Lilienthal, later to become first chairman of the AEC, he drafted the so-called Baruch Plan for international nuclear control. Almost as a matter of course, he became the first chairman of the new AEC's general advisory committee, the key scientific council of the agency.

## Attack Cause Is Now Clear

In the light of two decades of hindsight, it is now clear that the policy positions he took in that job were the cause of the attack that brought him down.

When news that the Russians had exploded their first atomic bomb came on Sept. 23, 1949, the almost automatic reaction of a large group of atomic scientists and military figures was to urge the immediate development of the hydrogen bomb. The theoretical possibility of making the super was widely understood.

Among the proponents of this counter to the Russian achievement was Edward Teller, another atomic scientist of towering reputation. He had, in fact, worked on the project at Los Alamos during the war years and was angry and frustrated that the idea had been dropped. Initially, he and Oppie had been friends, members of a mutual admiration society, but bitterness, envy and much animosity had developed.

In the early stages, he underwent repeated security investigations. His left-wing associations had been abundant and obvious. He came clean before his interrogators about most of them, and his security file grew thicker and thicker.

To the horror of Teller and some others, particularly in the air force, it was learned that Oppenheimer and the entire general advisory committee were recommending against developing the H-bomb. Their reasons were diverse.

Some felt that the manufacture of the fusion weapon, under methods then conceived, would divert so much facilities and material from the manufacture of atomic bombs that the United States would end up with less rather than more nuclear power.

Accordingly, they argued, this was the moment to go to the Russians with this forecast in the hope that a new try for negotiations could be begun, born out of common terror of the greater enemy.

## Truman Ruled AEC Wrong

The AEC backed the recommendation, 3 to 2, but President Truman decided otherwise.

In the security hearings five years later, Oppenheimer was accused of thwarting progress on the H-bomb project. On examination, the charge boiled down to the assertion that his lack of enthusiasm deterred other scientists from putting their heart and talents into the program. No shred of evidence for the complaint was ever adduced. As was later to appear, the most powerful, though covert, enemy of Oppenheimer was the air force. Its strategy then was the H-bomb, first and last.

There was more. Even after the move to Los Alamos, Oppenheimer spent the night with an old love, a Communist. His own wife, Katherine, had been the widow of a Communist killed fighting for the Loyalists in Spain. She too, had been a party member before her disillusionment. His brother, his sister-in-law, a host of earlier associates, were in the thick of far-left associations and causes. He continued seeing some of them.

The attack on Oppenheimer did not come until 1953, by which time McCarthyism was at its apogee. The Wisconsin senator never took aim at Oppenheimer, but he was a victim of the epidemic nonetheless. Stupidities and pieces of naivete, even unwise friendships, that once could have been forgiven, now ap-

## NO PRIZE FOR PEACE LAST YEAR

(An Editorial in Scala International, Frankfurt)

The Nobel Prize Committee found not one worthy of being awarded the Nobel Peace Prize in 1966. There is no doubt that all those who were awarded the prize in previous years, were honored for services worthy of this distinction. The photographs of these men rarely adorn the covers of the illustrated magazines, which are usually reserved for beautiful women and "heroes" of another kind.

But, a few years ago, this "honor" was accorded to the winner of a Nobel Peace Prize. The magazine covers carried the picture of a man whose life had already become almost a myth, a myth of humanity, of active and selfless charity.

The man who looked out at us from those pictures with eyes puffed up by bushy brows, his mouth overhung by a massive, white moustache, which almost made him look like a child's idea of a brigand chief, was Albert Schweitzer.

Was there anyone, after the death of Gandhi, able to accept the peace prize founded by the inventor of dynamite with a clearer conscience? In this century, research aimed at providing mankind with a better life has borne rich fruit, and medical scientists, in particular, are today able to do things bordering on the miraculous. These scientists and scholars have rightly been rewarded with the money left by Alfred Nobel.

But the knowledge gathered by modern science has also placed mankind on the brink of an abyss — though it has at the same time, in view of the existing means of mass destruction, made an anachronism of Clausewitz's thesis that war is the continuation of politics by other means.

Man has almost become Superman, but has the quality of his conscience kept pace with the quantity of his knowledge? The history of the 20th century obliges one to answer that question in the negative, but the years after the Second World War do not negate all hope. For there are men and women in every country of the world who are devoting all their strength to the cause of peace.

It is up to all of us to join them in their efforts. What is more, it is up to all of us to realize that the voice of conscience comes before the voice of reason and to act accordingly.

The hearings were held throughout May, 1954. Oppenheimer knew what the outcome would be before they started. "They just couldn't let me win," he said.

From the first day, it was clear that the process was an inquisition, a trial without the legal safeguards a court guarantees a defendant. Why Oppenheimer and his counsel tolerated it is an unanswered question.

Forty witnesses testified. The transcript ran to 993 fine-print pages. The Chevalier incident and Oppenheimer's attitude toward the H-bomb were the cardinal points.

Most of the witnesses, including some of the greatest names in science and government, were ardent in their defense of Oppenheimer Nobel Prize winner I. I. Rabi put the matter in a nutshell:

"We had an A-bomb and a whole series of it... and what more do you want, mermaids?"

Some felt that the manufacture of the fusion weapon, under methods then conceived, would divert so much facilities and material from the manufacture of atomic bombs that the United States would end up with less rather than more nuclear power.

Accordingly, they argued, this was the moment to go to the Russians with this forecast in the hope that a new try for negotiations could be begun, born out of common terror of the greater enemy.

The AEC backed the recommendation, 3 to 2, but President Truman decided otherwise.

In the security hearings five years later, Oppenheimer was accused of thwarting progress on the H-bomb project. ## Why Is Social Progress Considered a Burden?

By DOUGLAS FISHER and HARRY S. CROWE

(Mr. Crowe is associate professor of history at Atkinson College, York University. Mr. Fisher, a former NDP MP, lectures in Canadian government at Carleton University.)

Are old age pensioners a burden? Are the sick a burden? If they are, then are motorists who demand modern multi-lane highways a burden? And are children who must be educated in an expensive school system a burden? Are all services provided by society to be looked upon as a burden?

Or is it the absence of these services — of pensions for the aged, of hospitals and medical insurance, of highways and adequate educational facilities — which is the burden? As James Jeffrey Roche put it many years ago:

"What careth the burden-bearer that Liberty packed his load,

"If Hunger presseth behind him with a sharp and ready goad?"

This batch of related questions is provoked by two excellent speeches in the House of Commons in the budget debate. Both are by New Democrats — David Lewis (York South) and Max Saltsman (Waterloo South). They deduce from the mini-budget of Mitchell Sharp and from statements he has made recently, in and out of the House, strong elements of the "burden theory" of social progress.

It is the idea that social progress is painful; that the people must be made aware of the pain and with this awareness they will make a minimum of demands to expand the services and activities of government.

Mr. Lewis put it this way: "It seems to me the minister was deliberately setting out to slow down social progress in Canada, to warn the Canadian people that from now on, so far as he and his colleagues are concerned, the progress of the Canadian people in regard to welfare would have to be slowed down because he said we can no longer afford these vast payments. I say, Mr. Speaker, that this is a retrograde step, a regressive policy, an unjustified attitude in these modern times... it will be as unnecessary in the future as it has been unnecessary in the past to match welfare increases by precise increases in taxes."

Mr. Saltsman went at the theoretical implications of Mr. Sharp's reference to welfare services as a "proper burden." He said: "The minister and the government, which I presume he represented in the presentation of his budget, had an opportunity to bring in social justice as something which should be brought in with pride and satisfaction, a sense of achievement, instead of representing it as a burden."

Mr. Saltsman went on, "This is the view of the minister and presumably the view of the government.

It will be noted these proposed measures and others which Mr. Saltsman advanced, have one characteristic, in common. They involve an expansion of the "public sector." Is it possible that here we may find the key to what is going on in the inner circles of Ottawa Liberalism? Is it possible that this might reveal what is behind the "burden" and the "chastising image?"

Many years ago Tommy Douglas said: "When people say it isn't money, it's the principle of the thing — then it's the money." When Ottawa Liberals, speaking of any new venture in the public sector say: "It isn't the principle, it's the money" — one must wonder if after all it is not really the principle.

Even co-operatives and credit unions came in for a sustained and inaccurate assault by a Liberal parliamentary secretary during the budget debate. That was "principle," not "money."

On all of this it would be enlightening to hear a learned dissertation from Jean Marchand. And if it is in fact the "principle," then some day we may.

# who wants labour-management consultation?

## employers

□ who really want to communicate with their employees;

□ who really want to improve their industrial relations;

□ who really want to discuss frankly those problems that can only be solved with the co-operation of their employees and their unions;

□ who really want to produce better products at more competitive prices;

□ who really want to increase their job security.

## employers & employees

□ who really want to see productivity rise, better products at lower prices, a high level of employment, and better working and living conditions.

If you are an employer or a member of a recognized, bona fide collective bargaining union, and want to join the increasing number of Canadians who are taking part in continuing joint consultation on a regular basis through Labour-Management Committees —

Write for complete information on how to set up such a committee to the:

Deputy Minister

## B.C.: Gallantry Amid the Shoddiness

British Columbia, according to one of its best-known writers is "living out the final stages of 19th century concepts in the latter half of the 20th century."

Writing in "Century — the Canadian Saga" a Southern Newspapers mass circulation supplement published last week, Campbell River author and magistrate Roderick Haig Brown's article titled "The Proligate Province" is a heavily qualified measure of his affection for B.C.

"He says that in British Columbia there has always been a gallantry about the job

and a shoddiness about the end result."

"The logger, the province's true aristocrat, stands large and bold against the background of his ravaged acres."

"The hardrock miner, courageous, skillful and hard-handed, moves on, leaving his ghost towns and tailings and abandoned millsites as scars upon the hillside."

"The fisherman, proud and independent, struggles in the chaos of a disorganized industry."

"The construction worker manoeuvres his mighty machines in frantic haste through mud and dust and rock to leave behind him drowned and derelict forests,

HAIG-BROWN  
... "Proligate Province"

arrogant mills and ill-planned cracker-box towns."

"Yet far more than this," continues Mr. Haig-Brown, "the province is an idea of pleasure and rich living, elegant houses hung on the rocks in West Vancouver, money made from nothing, as it always has been, in the big buildings downtown."

"It is rather easy to think of the development of British Columbia as a series of engineering triumphs — but engineering miracles of all the provinces."

"The vision has become blurred in the rush of prosperity, it can still be renewed in the calmer time of consolidation."

DOWDING  
"board influenced"

**OPERATION SCUTTLE BUTTLE—DOWDING**

## 'Legal Misconduct' Charge Hurled at Gov't Department

BY GLEN ALLEN

An opposition anchor man in the budget debate Monday accused the department of lands, forests and water resources of "legal misconduct". He said the department is influencing the Pollution Control Board.

In a stinging attack on what he called "Operation Scuttle Buttle" Gordon Dowding (NDP—Burna by-Edmonds) questioned Resources Minister Ray Williston's claim that he did not direct the board.

"How credulous does he sup-

pose the public is, or we are, or the courts?"

"What need was there to pass any secret messages to the board when government statements have reverberated around their ears during these past years?

"We have the minister of recreation stating three years ago that he was going to revise the sacred inviolability of our parks and open them to selective logging and mining.

"We have the government telling the public last year that mining in that park was a fait accompli and irreversible.

"How credulous does he sup-

pose anyone be so ingenuous as to suppose the Pollution Control Board had stopped its ears?"

Mr. Dowding also questioned that salaried civil servants subject to "discipline and promotion" would not be open to influence.

#### SICK ATTACK

Over the shout from Municipal Affairs Minister Dan Campbell that "this is a very sick attack on the civil service," Mr. Dowding added that "only a board of detached uninvolved public men can do the job."

"There is too much of a political taint to the waters of Battle Lake," he said.

#### MISCONDUCT

Mr. Dowding also charged that the decision of the B.C. Court of Appeal to invalidate Western Mines Ltd.'s dumping permits showed the PCB was "found guilty of the worst kind of political misconduct."

He said "legal misconduct" means failure to conduct a hearing properly."

He said other instances where the Social Credit government had failed to grant proper hearings were in the G. P. Jones (former chairman of the purchasing commission), case and in a case of Welfare Institutions Licensing Board hearing.

#### LEAD ROLE

"What is more disturbing," said Mr. Dowding, "is that the minister of land, forests and water resources has taken such a large role in assuming jurisdiction in pollution control."

He charged that Mr. Williston was "going after pollution control" at the same time as he was granting licences "to pollute the landscape."

Mr. Dowding said the real authority over the pollution of a watershed is the provincial board of health.

Citing three sections of the Health Act, he said "the Pollution Control Board is usurping the primary duty and powers vested in the Provincial Board of Health."

He said he "was given to understand" that a local health officer was ordered not to sample the water at Battle Lake.

#### LET PUBLIC IN'

"It is time the public was let in on what the minister of health has to say," said Mr. Dowding.

Earlier in his speech he asked the cabinet to sign an order-in-council to have the minister of an oral question period in the house put before the B.C. Court of Appeal.

Mr. Dowding would ask the cabinet to ask the court for a ruling as to whether the privileges of the legislative assembly include such a privilege.

## 600 Attend Rites For Storm Victims

AHOUSAT — The largest funeral service ever known here — for the three drownings when an Ahousat fish boat sank off Tofino — was held in the Community Hall Monday.

More than 600 attended the service for John Jack August, 65, Mrs. Gloria McCarthy, and Bruce Hill.

A morning service was con-

## Unmarked Vials Used For Serum Shipment

CLEVELAND, Ohio (AP) — Doctors from Idaho and Washington State testified Monday they received supplies of Rand Development Corp.'s controversial cancer vaccine in unmarked vials after federal authorities had refused to allow interstate shipment.

Dr. Phillip N. Leavitt of Idaho Falls and Dr. Clifford W.

## DIVORCES

Divorces were granted in Victoria Law Courts Monday:

Charles D. Schulz, 2550 Highland Boulevard, Nanaimo, from Norah L. Schulz, 440 Simcoe Street, Victoria. They were married at Victoria in 1945.

Dennis C. Morgan, 2611 Savory Road, Victoria, from Patricia M. Morgan, 128 Hampton Road, Victoria. They were married at Victoria in 1958.

Erling H. Olson, 4015 Sooke Road, Victoria, from Laura T. Olson, 1287 Park Terrace, Esquimalt. They were married at Seattle in 1948.

Lucille G. Earle, 1261 Woodway Avenue, Victoria, from Donald E. Earle, 937 Johnson Street. They were married at Victoria in 1958.

## Man Charged After Chase At Ladysmith

LADYSMITH — Ronald Arthur Clavering, Kelsey Bay, was to appear in court here today charged with car theft and criminal negligence in the operation of a car.

Clavering was arrested by Ladysmith RCMP Monday after a man rolled a car over twice.

This followed a high speed chase on the Trans-Canada Highway.

The chase started just after noon when police received a complaint of a man driving erratically.

Constable William Armstrong picked up the chase on First Avenue and hit speeds of 80 and 90 miles an hour in pursuit.

The fleeing driver finally turned off the highway into Cedar Road and was near North Oyler School when the car turned over.

The driver escaped without injury and three Ladysmith juveniles who had hitched a ride were shaken but unhurt.

Clavering made no plea when he made in initial court appearance Monday afternoon.

The car thief allegedly took place at Kelsey Bay.

\* \* \*

CHEMAINUS — A 23-year-old man was sentenced to three months in jail Monday after pleading guilty to charges of creating a disturbance and resisting arrest.

Magistrate George Hallett was told police arrested Bruce Hamilton Ballie at a private house party Saturday night.

## ETHICS BREACH CHARGED

NANAIMO (CP)—Dr. J. M. Thomas, president of the Nanaimo branch of the Canadian Mental Health Association, has accused provincial mental health authorities of breaching medical ethics.

In a letter Monday to Health Minister Black, Dr. Thomas said psychiatric patients requiring expensive drugs are refused free supply unless placed under the total care of the upper Vancouver Island Provincial Mental Health Clinic.

#### DISRESPECT

"As a result, these patients are removed from the care of their personal physician whether either desires it or not," said Dr. Thomas.

He said this represents a grave disservice to private practitioners, constitutes a breach of medical ethics and is an injustice to the patients.

He said provision of free drugs for mentally-ill persons under the care of private physicians would eliminate expensive hospital treatment which must be paid by the taxpayers.

## Sex Education In Grade One Wins Support

More than 100 Sidney and North Saanich parents Monday voted to have sex instruction begin in grade one on a

jurisdictional basis.

The vote followed a discussion at Sidney where the parents listened to six panelists unanimously advocate more parental support in the field of sex education.

The parents endorsed a program which would begin in grade one and progress through grade school. It would be titled Family Life Education.

A physician with the Metropolitan Board of Health, Dr. Elizabeth Patriarche, blamed ignorance on this subject for "rising rates of delinquency, unwed mothers, divorce and venereal disease."

"It is not enough to bombard youth with a few facts about reproduction," said Ruby Mae Parrott, a Saanich school board member.

A social worker, Mrs. Fay Macfarlane, charged parental ignorance was to blame for the "teenager's inclination to turn to his or her friends for answers that are not forthcoming at home."

Costume Ball, Tattoo Listed For Centenary

## \$50,000 DAMAGE

## Camsell Arrives At Stricken Isle

NORTH COWICHAN — The municipal centennial committee Monday published an interim calendar of events.

They range from a costume ball and military tattoo to the visit of the centennial caravan.

Starting March 3, the schedule is: Costume Day luncheon at Chemainus; March 17, Legion costume ball at Chemainus; April 3-7, special events during Chamber of Commerce Week; April 7-8, Duncan Music Club's production of "Showboat" at Cowichan High School; April 18, Best of Barkerville at Chemainus High School; April 20, fashion show by Crofton Hospital Women's Auxiliary.

STAYS WEEK

The Camsell is expected to stay over a week to carry out extensive repair work.

First news of the trouble

Fisheries Body To Meet March 1

The semi-annual meeting of the Federal-Provincial British Columbia Fisheries Committee will be held in Nanaimo from March 1 to 3.

It is expected that subjects under discussion will include:

log drives on the Stikine River, oyster regulations, control of oyster drift, tidal boundaries,

licensing of salt-water sports

fishermen, fishery development

projects, operations of provincial fishermen's liaison boards, and recommendations of the special committee on fisheries which has been established by the provincial cabinet.

The Coast Guard ship Camsell, on a mercy run to stricken Pine Island, arrived at 11 this morning.

The ship carried building materials, a helicopter, and technicians and tradesmen.

She was despatched to the island lighthouse station at the northern tip of Vancouver Island after a 50-foot wave swept over the island in a weekend storm.

Two families on the island, 240 miles from Victoria, lightkeeper Rex Brown, wife and two children, and Jim Lewis and his wife were left without power and telephones. The lightkeeper and his wife escaped serious damage.

STAYS WEEK

The Camsell is expected to stay over a week to carry out extensive repair work.

First news of the trouble

Fisheries Body To Meet March 1

The semi-annual meeting of the Federal-Provincial British Columbia Fisheries Committee will be held in Nanaimo from March 1 to 3.

It is expected that subjects under discussion will include:

log drives on the Stikine River, oyster regulations, control of oyster drift, tidal boundaries,

licensing of salt-water sports

fishermen, fishery development

projects, operations of provincial fishermen's liaison boards, and recommendations of the special committee on fisheries which has been established by the provincial cabinet.

Pioneer medals will be presented at the Forest Museum, probably July 8, and the Cowichan Timber Carnival will be repeated at Pioneer Park on a date to be announced.

# Delay in School Tied to Cabinet

Saanich Rejects Criticism From Social Credit Official

By ROGER STONEBANKS

The blame for the delay in a vocational school in this area belong with the government and not with Saanich, the municipal council agreed Monday night.

"I resent the suggestion that Saanich is the villain of the piece," Reeve Hugh Curtis told Ross Regan, second vice-president of the Esquimalt Social Credit Constituency Association.

"Your concern is commendable but I think you're in the wrong building."

A vocational school has been planned for several years at Burnside and Trans-Canada Highway. Saanich has provided six acres but 25 acres are needed.

Neighboring property is owned by B.C. Hydro and privately.

A letter from the Social Credit group said Saanich has accepted responsibility for finding the land and asked how it proposed to solve the problem.

"It's the provincial government who will assemble the land to put it on."

"Some of us believe there is as much importance for a vocational school as an arena on 20 acres you propose at Tillicum," he said.

"Obviously this is going to continue as to who is going to do it."

**Commitment Ends With Land**

Reeve Curtis said there has never been a suggestion of commitment by Saanich except responding to a provincial request to turn over six acres to the province.

"Hydro is not willing to pay the going price. It is not a municipal responsibility to pay it just because a crown agency won't."

"The property that is needed is B.C. Hydro. If they can't resolve it I don't see why Saanich should resolve it."

"If a higher priority were placed on a vocational school, it would be under construction today."

Municipal planner Tom Loney said he has discussed with B.C. Hydro two different locations for an electrical substation and Hydro was looking at a third.

"There's nothing to prevent hydro from expropriating," said Reeve Curtis. "If the need is so urgent, why has expropriation not been launched — for a site for hydro or for the remaining private land."

Mr. Regan said if Saanich had provided the land the vocational school would be on its way.

It was suggested the Esquimalt Social Credit Constituency Association ask area MLAs to press the government "to get going."

"We've done that as well," said Mr. Regan.

**IN CENTRAL COURT**

## Tax Deadline Missed; Employer Fined \$200

An employer who neglected to forward his staff's income tax deductions to the government before the deadline was fined \$200 in central court Monday.

John McBride Moore, operator of Moore Printing Co. at 365 Johnson, pleaded guilty to the offence under the Income Tax Act.

He told the court he was unaware the \$31.01 in withheld taxes had not been forwarded by last Nov. 15 as he was not handling the company's books.

The \$200 fine represents the minimum under the act.

A woman who shopped children's clothing while accompanied by her five-year-old son was fined \$75.

Mrs. Kathleen Tenhave, 251 Craigowan, pleaded not guilty.

**TWO SHIRTS**

The accused put two child's shirts, a raincoat and a summer play suit in a shopping bag and then paid only for a hat for her little boy when shopping at the Bay Jan. 30, court was told.

She was stopped by store detectives before she left the store.

The stolen clothing was worth \$10.78 and Mrs. Tenhave had over \$7 in her purse when arrested.

**Up-Island Man Suffered Attack Before Collision**

A heart attack suffered by Cobble Hill man was responsible for a two-car crash on the Trans-Canada Highway Sunday morning. Coroner Edmond St. Jorre ruled Monday.

Albert Ernest Harrison, 62, was dead on arrival at hospital following the almost-head-on collision at Grange Road.

The coroner said a pathologist's report showed the dead man suffered a seizure. No one was to blame in the accident, he ruled.

Mr. Harrison's wife, Susan, 55, is in good condition at St. Joseph's Hospital from injuries she suffered in the crash.

The driver of the other car, Gordon Heit of 3084 Jacklin, and his two passengers received only minor injuries.

## Bastion Grant Request Sticky Wicket

Oak Bay council split down the middle at a meeting Monday over a grant-in-aid to Bastion Theatre.

Commenting on a letter from director Peter Mannerling, who said 40 per cent of the season ticket holders are from Oak Bay, Coun. J. D. Watt said: "Oak Bay derives a benefit out of all proportion to the inter-municipal financing formula."

"This grant is a little different," he said.

Coun. J. W. Wade said it would creating a precedent if the theatre got special consideration.

"What about the other theatrical groups — and the music school?" he asked.

"This is nothing new," said Coun. Fred Hawes. "It's definitely an inter-municipal problem."

**SPECIAL CASE**

Coun. Frances Elford, who said the theatre presented a special case, suggested the matter be referred to the Community Welfare council.

Reeve Cox said the matter should be studied by the Inter-municipal Committee and the council's own estimates committee "so it doesn't get sidetracked."

**COUNCIL AGREED**

Mr. Mannerling, who said the Oak Bay use of both theatre and school facilities rivaled that of the city itself, had asked for a grant of \$2,000.

In other business council:

• Referred to estimates committee a 1967 Oak Bay police budget of \$193,844;

• Re-appointed J. Macé, G. Taylor and R. Freethy to the Oak Bay Recreation Commission and recognized E. Costain, Mrs. K. Costain, Mr. Symons, and Mrs. I. Craig for 10 years service to the commission;

• Adopted an Inter-municipal Committee cost-sharing arrangement for the coming fiscal year whereby the municipality's share, on a variable plan, ranges from 12.85 to 12.54 per cent;

• Approved a Greater Victoria Inter-municipal Committee grant of their share of \$1,000 for a playground supervisors workshop.

## HIGH SCHOOL 'BRIGHTENED' BY MOB GARB

PRINCE RUPERT, B.C. (CP) — Clothing styles from London's Carnaby Street drove the entire high school population in this northern coastal city mad Monday, and the principal went with them.

"Birds" in mini-skirts or bell-bottoms mingled with boys dressed in low-slung chequered pants and flowered shirts, while principal Bill O'Brien sported a bright Paisley tie fastened with the double-double Windsor knot favored by the "in" crowd.

"We did it for a change," said Mr. O'Brien. "It certainly brightened up a dull winter's day."

The mini-skirts created no problem, Mr. O'Brien said the long, heavy stockings worn by the girls took care of any minor concentration.

### Gov't Animal Care?

OTTAWA (CP) — A report on the feasibility of setting up a Canadian council for animal care is expected in about three weeks, Prime Minister Pearson told the Commons Monday.

Barry Mather (NDP—New Westminster) had asked whether the question of animal welfare could be referred to a parliamentary committee.

James Pace, 897 Swan, was fined \$5 when he pleaded guilty to letting his dog run at large.

Pound keeper Albert Ost told the court he had chased the accused's dog for a block before it ran home.

Pace told the court two weeks ago that his dog left its property to chase the dog catcher.

Stanley Rife, 136 Medina, was fined \$75 for wilful damage.

He was charged after a family argument Sunday night when he kicked and damaged a doorway after his wife refused to leave a Front Street residence.

Rife was also ordered to pay for the \$10 damage to the door.

**POSSESSION**

Lawrence Fiddick, 539 Judith, was fined \$35 when he pleaded guilty to being a minor in possession of liquor.

Police spotted him hiding a bottle of beer in the grass in Mount Douglas Park last May 28.

**BROTHERHOOD WILL BE RETROACTIVE**

It has been Brotherhood Week in Victoria since last Sunday but city council won't get around to making it official until Thursday.

The official resolution will be passed at the regular council meeting Thursday afternoon declaring Feb. 19-26 Brotherhood Week.

**THE WEEK**

The week, sponsored by the Canadian Council of Christians and Jews, is designed to give citizens an opportunity to rededicate themselves as individuals to the basic ideals of respect for people and human rights.

**COLD WEATHER**

"And if the minister of education re-writes his freeze school construction it will read: 'I didn't mean schools when I said there would be a freeze. I was merely making a comment about the weather.'

"I can see his revision:

## ANIMAL BYLAW UNDER SCRUTINY

# Do Dogs Have Right to Stroll in Parks?

Heavier punishments and stronger enforcement of the present animals bylaw in Saanich were suggested Monday night.

At a council meeting, Coun. Edward Lum said the bylaw is sufficient "if we had the men to enforce it."

Two ratepayers told council the owners of roaming dogs should have to pay double the fine each time and that license fees should be low, but those who don't have licenses should be heavily fined.

A draft new animals bylaw continues existing regulations on dogs at large, but introduces restrictions on the numbers of pets that could be kept in a home.

It is stressed, however, that the draft is only that. Council is seeking written public comments before considering the proposal.

Council agreed that because of the interest in the subject, copies of the draft should be made available at the Municipal Hall, at a price to be set by comptroller John Tribe which would cover stationery costs.

"We'll be getting lots of requests since the

Times came out with it," said Coun. Lum. "I've had calls."

Added Reeve Hugh Curtis: "I think I've had calls from talking dogs."

Municipal planner Tom Loney said it is felt that after replies are received, a new draft will be prepared for the lands and planning committee to study.

Coun. Leslie Passmore made the verbal suggestion that no dogs should be allowed in public parks and beaches because they foul the ground children are playing on.

(Both the existing and draft bylaws allow dogs in these areas but only on a leash or chain.)

Coun. William Noel disagreed, and Reeve Curtis thought this restriction is "close to infringing on civil rights."

One ratepayer, who said he has exhibited dogs across the continent, said motels prefer dogs to children "because they don't steal towels."

Coun. Passmore stuck to his no-parks argument. "Dogs excrete and I don't like it. It is not sanitary, not hygienic and not desirable."

CURTIS  
WHO'S BARKING?

## Bylaw Cut Back To \$950,000

Saanich council agreed to a proposal Monday night which would lower the amount needed to borrow for the recreation referendum next month.

Comptroller-treasurer John Tribe suggested the \$1.2 million necessary could be raised by a one-mill levy for this year and next year's council would undoubtedly provide this sum in its budget.

This would provide \$98,000 this year and \$102,000 next year. To that would be added \$100,000 appropriation from tax sale lands, leaving \$950,000 to be borrowed.

Mr. Tribe said the inspector of municipalities has indicated approval will be given to submit the referendum to the ratepayers, probably on March 18.

**NEXT YEAR**

"I realize of course that this year's council cannot commit next year's council to provide one mill," he said.

"However, it is suggested that the bylaw contain a recital to the effect that it is desirable to place one mill in this year's budget and a recital to the

programme that it is anticipated that it is anticipated that one mill will be provided next year.

"If the electors approve of the bylaw, then we can assume that they have also approved of the one-mill levies for this year and next year's council would be providing this sum in its budget."

This would provide \$98,000 this year and \$102,000 next year. To that would be added \$100,000 appropriation from tax sale lands, leaving \$950,000 to be borrowed.

Mr. Tribe said it would not be necessary to borrow until next year so there would be no debt repayment until 1969.

"This is designed to smooth things out," he said, noting that in coming years Saanich will be borrowing for the capital projects budget approved in the 1965 municipal elections. So far there has been no borrowing for this program.

He explained that one mill is equal to about two per cent in taxes — a person with a tax bill of \$400, which is high, would pay an extra \$8.

## NORAD on Watch For Space Invasion

If we don't get it from the air, or from the sea, it will come from outer space.

A team of three NORAD officers in Victoria to tell the story of the North American Air Defence Command named the threats to the continent.

"Bombers are still a threat," said Flt-Lt. Donald Middleton, RCAF, stationed at Campbell River. "But there is also the possibility of submarine attacks, attacks by ICBMs and attacks from space."

Lt-Col. Al Davis of USAF from Colorado Springs said, to obviate surprise attack from anywhere, hundreds of jet aircraft carry out monthly trans-continental exercises.

Exercises are recorded on tape or film and are tracked by the radar stations, seven of them in this province.

There is one tracking station at Holberg on the Island.

NORAD was formed in 1957

## Coal Mine Struck

MICHEL, B.C. (CP) — A strike by about 500 men Monday closed down the coal mine operations of Crowsnest Industries Ltd. near the British Columbia-Alberta border. The men, members of the United Mine Workers of America, turned down a settlement recommended by their union executive to back contract demands.

Exercises are recorded on tape or film and are tracked by the radar stations, seven of them in this province.

There is one tracking station at Holberg on the Island.

NORAD was formed in 1957

## Street Light Purchase Set By View Royal

Annual meeting of View Royal Fire Protection District Monday voted to install 162 street lights covering all areas of the district.

The project will add 1.5 miles to the tax rate.

Work will await provincial government approval.

The meeting re-elected Edward Stancil to a further three-year term as trustee. Robert Pearce won a two-year term.

Fire Chief Albert Beasley reported the volunteer department attended 28 fires last year.

# SPORTS

DOUG PEDEN, Sports Editor

## Hal Malone LOOKS AT SPORTS

The Canadian football season is five months away from the starting gate, but already they're kicking the ball around.

The ball, in this case, is Senator Keith Davey's head. According to the ripest rumors, directors of the CFL will sever the senator from his \$25,000 per year post as commissioner in Toronto this week.

If you believe everything you read in the newspapers, the senator will get it where Hazel wore the beads by an 8-1 vote.

Normally I don't get worked up about what the Canadian Football League does. For a good reason. The CFL rarely does anything.

Oh, the directors meet once in a while and discuss such matters as eliminating the Western and Eastern Conferences and making it one league. That makes sense. Perhaps because it does, the CFL does nothing about it.

The league has also experimented in new goalposts which you must admit is extremely radical.

But for the CFL to consider turning out its commissioner after 51 days in office seems to demand an explanation. Certainly it sets a new track record for CFL action.

### Make Up Your Minds, Will Ya?

The CFL, while not always geared to change, has never jacked for explanations.

Boiled down, in the senator's case, they seem to amount to one thing—he talks too much.

If memory serves, one of the complaints the directors had about Davey's predecessor, Sydney Halter, was that he talked too little. Silence may be a virtue in wives and mothers-in-law, but it is necessary when you are commissioner and expected to polish the image of the employers' product.

The CFL was also disenchanted with Halter because he wouldn't move his office to Toronto, the good. A lawyer, he declined steadfastly to leave Winnipeg, the cold. Whenever he wanted to talk to him they had to pick up the blower and go through legal secretaries.

Davey did not apply for the job after Halter walked through the door. The CFL approached the senator, who agreed to conduct business from Toronto.

### 'Metropolitan' Regina Made It

The third day Davey was in his office a west coast newsman, endeavoring to find out if Davey was accessible, dialed the CFL number off a business card the commissioner had sent out.

The phone rang twice and then a voice said, "Keith Davey here." The newsman was so stunned—"I didn't even know Halter had a number"—that he couldn't wait to write that the CFL and its new commissioner were definitely "open for business."

Where Halter was austere and polite, Davey has apparently been affable and polite. Too affable, claim CFL directors.

What, one wonders, has been so reprehensible about Davey's public conversations?

He talked enthusiastically about expansion. Move the game into the Maritimes, northern Ontario, Saskatoon and Victoria, where for the most part they play strictly parlor football.

In this regard Davey may have been frying the eggs before he had the chickens, since most of the outposts he mentioned don't have stadiums large enough to hold a cribbage tournament. But Regina isn't exactly a metropolis either, yet the farm boys had a will to find a way.

### 'Here's Your Liver Pills Cup'

Davey also said that he would prefer the CFL to name its own outstanding players rather than peddle the annual prestige awards to a distillery. This isn't a stance that is difficult to applaud.

Does the National Hockey League present the Carter's Little Liver Pills trophy to Bobby Hull for his scoring feats? Do Green Bay Packers get the Chicago Stockyards' Association Cup for having the best lineman on the hoof?

Davey had a conversation with Sam Berger, president of the Ottawa Rough Riders. The essence of it was that Davey would like to see Montreal's muddled ownership situation straightened.

CFL directors have been saying this for years, but not publicly. Davey thought he was speaking privately to Berger. But Sam exhibited a touch of ham by making it public. Then he stuck his fork in Davey's shoulder blades "for discussing private business in public."

### Lighting Lanterns in the Cave

Davey was to draft, with Berger, a CFL opinion on cable television for presentation to the federal government before a White Paper, now in production, is issued on this thorny subject. Berger says Davey did not meet him, thus throttling a CFL lobby on cable TV.

Had Davey agreed, it would have meant that he would have had to twist the wrists of his former government associates. For what? For selfish CFL motives.

No man is free to do as he pleases. Davey knows enough about politics to know something about compromise. But the CFL directors may seek to impose restrictions on him that would be tantamount to surrender.

If that happens he will have to decide if he wants to lower his standards and join the Seventeenth Century segment of the CFL back there in the cave, lighting gas lanterns.

If running is your game, the Victoria YM-YWCA's Centennial 100-mile endurance test offers the opportunity. More than two dozen runners from all walks of life participated Thursday as the

"competition" got under way at Reynolds Park. They included British Columbia Resources Minister Ray Williston, "Y" physical director Art Burgess and former track ace—lawyer Robert Hutchison.

Even if you didn't run Monday you can still get in on the fun and exercise. Anyone who completes a 100-mile run will be awarded a silver Centennial spoon. (Photo by Jim Ryan.)

Line shows route of canoe trip across Canada. At stars is where they must get out and walk.

### BY CANOE IN CENTENNIAL SAGA

## Getting to Expo the Hard Way

**NEW WESTMINSTER** — The spirit of adventure is still very much alive in Canada and four Royal City men are out to prove it.

The group is planning a 6,000-mile journey to Montreal starting April 1, by canoe, retracing the exact route along the trans-Canada waterway Simon Fraser took in 1808.

All other Centennial canoe sagas pale by comparison. The federal government-sponsored journey by 10 canoe teams will leave Alberta later this year and travel some of the distance by truck.

## LIGHTS! CAMERA! SCREEEECH CRASH!! THE END

**By DON VIPOND** — Seeing is believing, a potent new safety program by Saanich police may cut the bloody toll on the highways.

The heart of the program is a film—Mechanized Death.

But there are no actors.

The film takes you along with the Ohio State Police as they handle accident cases.

Here is a state trooper bursting into tears as he lifts the smashed body of a baby from a wrecked car.

And there is the body of a young man, his head literally welded to the door frame.

The red in the film is blood—an honest-to-God sticky human blood.

And the screams are from people who are really cut, smashed, broken and in some cases dying.

A film for sadists, for ghouls? Not at all, says Constable Bill Chisholm. It's a film for anybody who drives because it portrays precisely what will happen to you in a bad accident.

### IN BUILDING

"People just don't realize what an accident is," he says. "It's better they find out in the safety of a building than out on the highway."

"We're not after making your stomach squeamish," says Chief W. A. Pearson. "We want to show people exactly what that word accident is all about."

The film shows not only the grisly results but reconstructs how these accidents happened.

The safety program, which includes the film, brief talks and some displays, has been shown at Saanich high schools and so far no teacher or student has complained about its realism.

In fact a number of students have said they'd like their parents to see it.

So this Saturday police are

**Burglar Walks Plank**

A thief walked up a plank placed beside the bedroom window of a Saanich home in a break-in reported Sunday.

Trevor Cole, 1650 Teakwood, told officers \$110 was missing from a wallet left in a jacket.

### HOME GARDEN

## Blue Popular Color To Mix With Yellow

**By HILDA BEASTALL** — The color blue is eagerly sought by many gardeners as being highly desirable in their plants.

There is no doubt of its suitability as a companion for the yellows and gold of spring, to accompany the soft pink and yellow of summer, and again in the early fall to set off the yellow and gold.

In each of these three seasons we Hilda may find a number of blue-flowered plants of easy culture once their few needs are known. Among the reticulata group of bulbous iris are some of the best blues of the garden. These are the dwarf irises which we may consider as late winter and earliest spring flowers.

Blue is a variable color with no two gardeners agreeing whether the shade is a lavender-blue, violet-blue, or a lavender-purple.

With these variables in mind it is well to see blue flowers blooming and choose the plants according to one's preferences.

All these little irises are lovely. Each kind has a specific name such as Iris reticulata cantab, a brilliant light blue; Iris R. Joyce is a handsome dark blue with bright gold markings on each of the falls (the petals that hang downwards). Reticulata means netted covering on corn.

And so it goes. In February we have these delightful iris with their blue flowers, to be followed by a surprising number of beautiful blue-flowered plants for each month right up until September after which time the color is absent from the garden for three months.

### AUDITOR-GENERAL COMPLAINS

## Money-Saving Tips Ignored

**OTTAWA (CP)** — Canada's cut 10,000 from the strength of auditor-general, the man who leads the regular forces.

With civilian demand high in 1965-66 for technicians and specialists, 64,000 personnel were paid re-engagement bonuses, totalling \$22,728,000.

The overlap of the programs a year ago resulted in the 463 persons receiving or being eligible for both incentives.

He also cited a case of 14 members of the army, returning from Cyprus to Canada, who were flown by service aircraft to Esquimalt, B.C., where they picked up their automobiles and then claimed travel expenses to return to eastern Canada. Their plane had stopped at Trenton, Ont., where they could have deplored at a saving of \$4,600 to the treasury, Mr. Henderson said.

He encountered lease-breaking problems and sour construction contracts on all sides.

And with the long memory proper to his office, the auditor-general reminded the federal government time and again about things found amiss in his earlier reports and still in need of correction.

Mr. Henderson's report for 1965-66, tabled Monday in the Commons, is the result of a year's examination of government departments for instances of doubtful judgment.

### HITS PAYMENTS

Mr. Henderson criticized payments by the defence department of both \$200 re-engagement bonuses and special-early-release allowances to some personnel.

Not only was it illogical, said the report, but the bonuses for agreeing to remain in the forces "did not stem the loss of skilled personnel to the extent expected."

During the two years from May, 1964 to May, 1965, 3,322 members of the armed forces received special benefits at a cost of \$9,800,000 for early retirement from the forces. The plan was introduced initially to

Long-term leases also caused headaches, especially to the defence department, which had to break several when it decided to close out many reserve units. One settlement in Toronto cost \$175,313.

The auditor-general let the cat out of the bag on government thinking about postal rates, giving the first firm indication that second-class rates will be raised this year. Losses in handling newspaper and periodical mailings resulted in \$28,100,000 of the postal department's overall \$34,500,000 deficit last year.

Mr. Henderson said he still is waiting to see action on his recommendations for a better

Pension Act and for tightened procedures in granting war veterans' allowances. He said the government is getting fraudulent claims from veterans, but it is not making a single prosecution.

He turned up cases of government annuity cheques going out to people now dead.

The federal government was, in effect, making grants to both Expo 67 and the CBC for their building programs. The grants were being called loans, even though Expo could never repay them and the CBC could do so only by special parliamentary appropriation.

**LOVE SCENE** between the mayor's wife (Amelia Hall) and Khlestakov (William Hutt) is interrupted by arrival of the mayor's daughter (Roberta Maxwell) in Stratford's production of "The Government Inspector", which opens at Royal Theatre tonight.

## Taste of Stratford Sampled Here Tonight

Everyone can't go to Stratford but Festival Canada is bringing a taste of two Stratford Festivals—one past and one to come—to everyone in a few Canadian cities.

At the Royal Theatre tonight the event opens with play that will be one of the major attractions of the coming season.

The Government Inspector, a tongue-in-cheek comedy by the great Russian author, Gogol, is directed by the Festival's artistic head, Michael Langham.

Brilliant costuming and staging complement the skilled

acting of a cast headed by two of the top names in Canadian theatre—Amelia Hall and William Hutt.

On Wednesday night, last season's most successful production, Shakespeare's romantic comedy, Twelfth Night, will be presented.

Under sponsorship of the B.C. Centennial Commission the appearance of the Stratford Festival Company is being made available at popular prices in order that the greatest number of Canadians may enjoy one of the country's most famous products during the centenary.

A travelling display of children's paintings, sponsored here by Victoria Centennial Society, moves from City Hall Wednesday to Esquimalt Sports Centre banquet room.

Friday the display will be in Oak Bay Municipal Hall and Tuesday it shifts to Saanich Municipal Hall for two days. Thursday, March 2, it will open at Central Saanich Municipal Hall. From there it goes to Edmonton.

The paintings were chosen from 3,000 entries by students aged 8 to 17 from all parts of Canada. The Ottawa Centennial Commission made the collection available.

The showing in Greater Victoria is the first in Canada.

**Killing in Jamaica**

KINGSTON (CP)—A man identified as a Jamaican Labor party supporter was shot and killed Saturday night during a spate of pre-election shootings in western Kingston, police said.

Police said gunmen fired several shots into a restaurant, killing Rudolph Reach and injuring two other men. Six more men were shot at elsewhere in the area.

Dr. Teuber is editor and co-editor of several professional journals in the United States. This was his first appearance in western Canada.

Other professors who took part in a question and discussion period on brain mechanisms and language were Dr. John H. Gilbert of UBC, Dr. F. A. Hamdy, Dr. Malcolm Graham and Dr. Otfried Spreen of UVic.

Dr. Spreen, a neuropsychologist, was chief speaker Sunday when he discussed psycholinguistics and aphasia, which is loss of speech through brain damage.

The workshop was organized by the UVic psychology department. Co-sponsors were the provincial department of health services and hospital insurance, and the B.C. Psychological Association.

Information gained through the sensory nerves is received by the brain in a computer-like process. How the data is transmitted by the brain into behaviorism is still in need of further study, said Dr. Teuber.

He stressed the value of an approach from several disciplines—linguistics, psychology and neurosurgery. In children, brain behaviorism determines both perception and response to language.

**ASTRONAUTS**

His work with the government includes study for NASA of the physiological and psychological effects on astronauts of isolation during space travel, and screening of flying personnel for the U.S. Air Force.

Information gained through the sensory nerves is received by the brain in a computer-like process. How the data is transmitted by the brain into behaviorism is still in need of further study, said Dr. Teuber.

He stressed the value of an approach from several disciplines—linguistics, psychology and neurosurgery. In children, brain behaviorism determines both perception and response to language.

**Joan Baez**

'Toned Down' For CIA?

TOKYO (UPI)—A Tokyo radio producer said today he deliberately misinterpreted remarks on political issues by folk singer Joan Baez during her recent performances here because he was under pressure from an alleged American intelligence agent.

Ichiro Takasaki said and American identifying himself as Harold Cooper forced him to tone down the pacifist Miss Baez's statements that accompanied her renditions of anti-war songs.

He said Cooper claimed he was "active in (American) intelligence activities" but did not say he was a member of the U.S. Central Intelligence Agency.

**DENIED AT EMBASSY**

An American embassy official in Tokyo said, "We categorically deny any insinuation that a representative of the U.S. government ever attempted to hinder Miss Baez's performances in Japan."

Takasaki said he could not reject "Cooper's pressure because he told me if I turned it down I would run into difficulty in my job." Takasaki said he visits the United States on jobs at least twice a year and he feared he would have visa problems if he refused to cooperate.

## TRY TO UNDERSTAND QUEBEC, SAYS LEVESQUE

# Suppose French Won Battle of Abraham

By DON VIPOND

The year is 1763 and France has dispatched an army of 50,000 crack troops to conquer the British in North America. The victory is won, the surviving British aristocracy flee to the homeland but a hardy band of Loyalists treks to the west coast, there to build an island colony of English Protestantism in a sea of French Catholicism.

This is the way one of French Canada's most eloquent voices rewrote history Monday night to try to show the pressures which have moulded Quebec.

"It's a part of history that when you get conquered you lose out for a while," Rene Levesque, former cabinet minister told an audience of about 100 in the gymnasium of

Lansdowne Junior High School.

Picture downtown Vancouver dominated by French firms think of a province where English Canadians, all with minimal education only, can hope for nothing better than a clerk's stool.

Visualize, he said, being asked for your train ticket in French only. And when you protest, being put off the train.

It happened recently in Quebec, with the languages reversed, of course.

Just make a little effort to understand it," he added of Quebec's current ferment.

"It stems from the consciousness of being behind times. And that's a very painful consciousness."

"It creates," he said, "a rage to catch up."

Quebec's surge to join the 20th century began with the rest of the world's "accelerated history" following the Second World War.

FROM SCRATCH

It involved first the creation "practically from scratch" of a high school system for about 400,000 French-Canadian students.

Up to then there was nothing beyond grade 6 or 7 for 95 per cent of French Canada's population.

In his own village of New Carlisle, in the Gaspe, he recalled only two of all the children he knew in his first eight years of schooling made it to college.

One died over the English

Channel in 1940 after enlisting the year before. And Mr. Levesque was the other.

AGGRESSIVE

The burgeoning school system has produced a youthful teaching profession impatient and aggressive and this has produced much of the current strife, he said.

Quebec is moving quickly to get back "its collective dignity and in this 'revolt of the people' won't settle for being clerks forever. The new generation will take over the province, he predicted.

The rest of Canada must understand that change will inevitably spill over into politics, into constitutional evolution.

But it's better to have a

healthier partner than one ailing, staying power in the rest of Canada to resist an American take-over."

The new generation in English Canada will understand this because modern times have taught them "the only stable thing is change."

The will understand, that is, "if they're not polished by their elders too much."

SATELLITE

Other views in a wide ranging speech:

On Vietnam: "We are without honor here. We're an economic satellite and we can't afford a foreign policy."

On a French language push for western Canada: "That's silly. No French Canadian in his right mind wants that."

On Confederation without Quebec: "There isn't the

staying power in the rest of Canada to resist an American take-over."

On the Quebec ferment in general: "In a great part it's our fault. There's no use being bitter."

One of the hottest moments in a question-and-answer period came when the former resources minister clashed with a French Canadian woman now settled in B.C.

SENTIMENT

Aggrieved, she said the federal government should "pipe in" from Quebec programs for the French Canadians here.

"As a Quebec man I'll give you a brutal answer," he said. Her children don't need French at all except "for your own sentimental reasons."

## Children's Paintings On Tour

## Draft-Dodger Grants Denied

OTTAWA (UPI)—Prime Minister Pearson denied Monday that the government donated money to a student group to publish a pamphlet urging draft-dodgers to come to Canada.

Opposition Leader Pierre Trudeau asked whether Pearson knew that the Student Union for Peace Action—which distributes a pamphlet entitled Escape from Freedom in the United States—received a \$4,000 award from the priory council.

Pearson told the House of Commons that he had not seen the literature but that if it urged draft-evaders to come to Canada, it did not reflect "Canadian government policy on this matter."

The government does not give financial support to

kind of activity, nor does it encourage it in any other way," Pearson said. He added that the grant had no relationship to the pamphlet.

Toronto-based SUPA is the biggest of several Canadian organizations ready to help Americans fleeing from military duty.

The group distributes information on Canadian immigration regulations and helps some draft-dodgers find jobs and lodgings in Canada.

### FIRM NOT TO BLAME

## Jar in Wrong Basket, Damage Suit Rejected

A woman shopper's claim against the Safeway store at Esquimalt was dismissed Monday in Victoria Law Courts.

Mrs. Angelina Rossiter of Victoria sought damages for severe injuries to her foot when a 32-ounce jar of mayonnaise fell from a shopping cart in the store.

### Legion Plans Installation

Gordon Rabey will be installed as president of the Britannia Branch, Royal Canadian Legion, at a ceremony in the Legion Hall, 1616 Blanshard, tonight at 8.

He succeeds Thomas H. Harris.

Leonard R. Stewart will be installed as first vice-president; Richard Fernyhough as second vice-president and Pat Bayes as finance chairman.

### IMPAIRED DRIVERS

Fined for impaired driving when they appeared Friday in traffic court:

John Cote, 22, of 951 Jasmine Avenue, \$300, after he drove his car off the end of O'Connell, a dead-end street, and 140 feet into a field, Dec. 26.

Raymond Hovind, 25, of 318 Simcoe Street, \$350 after he was stopped by police in a road safety check on Government Street Feb. 11.

### ESQUIMALT TO HONOR JAMES BRYANT

Esquimalt council will honor long-time councillor James Bryant at Friday night's hockey game in the Esquimalt Sports Centre.

Mrs. Bryant is retiring from civic politics after 16 years of service on the Esquimalt council.

He was defeated in his latest bid to retain his seat on council during last December's elections.

A presentation will be made to the veteran municipal politician between the first and second periods of the game.

### Oceanography Centre

OTTAWA (CP)—A Canadian oceanographic identification centre will be set up in Ottawa, the national museum announced Monday. E. L. Bousfield, chief zoologist of the museum's natural history branch, will be director of the centre. It will provide technical assistance in sorting and classifying collections sent in by government departments, universities or marine institutes carrying out research.

### Protest in Commons

LONDON (AP)—Two youths and a girl shouting protests against the Vietnam war were hustled out of the public gallery of the House of Commons Monday night during a debate on highway safety. The girl showered leaflets into the chamber and screamed: "Why are you talking about accidental deaths when deliberate murder is being carried out in Vietnam?"

## Budget Really At \$950 Million?

### Oak Bay MLA Adds Up Funds; Asks for Full Accounting

Premier Bennett's budget really is \$950 million and not \$740 million, but almost one-quarter of it is not accounted for, Alan Macfarlane (L—Oak Bay) claimed in the legislature Monday.

He said the difference of \$210 million is the budgetary reserve, various funds set up from surplus revenues and the \$80 million borrowed from the Canada Pension Plan.

"The question in this budget debate is: where is this \$210 million? Has it been diverted into the Peace River?

### CONSTRUCTION

"Why is it not available for school construction, for hospital construction and for the satisfaction of the needs of our people?"

Mr. Macfarlane noted Recreation and Conservation Minister Kenneth Kiernan's argument that the reserve was needed to guarantee to investors the ability of B.C. Hydro to meet its heavy debts.

"This is the first indication we've had in this province that the B.C. Hydro program could go sour," he said.

He said Mr. Kiernan's statement repudiates Premier Bennett's statement that the two-river policy was assured of financing by his takeover of the B.C. Electric and its credit resources, he said.

### RESERVE FUND

B.C. Hydro debts were supposed to be self-liquidating so they shouldn't need a provincial reserve fund, he added.

Mr. Macfarlane also pointed out that the premier said in his budget the reserve funds would enable the province to continue building schools, hospitals and other projects during crisis periods in international money markets — yet he put a freeze on such construction instead of using the reserve.

"They (the government) have been caught in their own web of glib explanations," said Mr. Macfarlane.

### SPUR OF MOMENT

"They use any explanation that comes to mind at the spur of the moment."

Mr. Macfarlane criticized Education Minister Leslie Peterson's boast that approval of a \$25 million bond issue would enable all essential school construction to proceed.

He said the Greater Victoria school board has a two-year-old backlog of \$2 million worth of construction approved by ratepayers and held up by the province and is facing a bylaw soon for \$8 to \$10 million more.

### SCHOOL DISTRICT

"How is \$2 million to meet the needs of the whole province when half of that, \$12 million, is needed in one school district alone?" he asked.

Mr. Macfarlane said Mr. Peterson should approve immediately funds for portable classrooms here to ease the shift system that is inevitable in the Gordon Head area this fall because the department held up approval for construction of Newton Elementary School.

## Vague Slanders Scored by Grit

Alan Macfarlane (L—Oak Bay) said Monday two local slanders and disreputable that can be brought on any man, he said, extolling Dr. Macdonald's contributions to higher education in B.C.

Mr. Macfarlane also criticized Mr. Skillings for "defaming university professors by laying out the clear impiado that they were encouraging U.S. draft dodgers and were encouraging the use of LSD and marijuana."

"But what appears most shameful is that when he was outside this house, he was not prepared to follow up his remarks."

## Arthur Mayse

Just often enough to remind me that memory is fallible and that references should be checked, some lynx-eyed reader catches me in error. So be informed that English novelist George Orwell did not die a suicide as I told you here last Thursday, but was removed from life by tuberculosis.

This information comes from University of Victoria student Hamar Foster, who did check, and promptly ran me to the end of a limb.

"In all his major writings and speeches" Mr. Foster points out, "especially '1984' and

'Animal Farm', Orwell is warning us of a future that we must constantly and consciously resist in every aspect of life. For such a man to commit suicide would surely be unthinkable; he would be denying the very humanity that he wished to save from totalitarian control should be take his own life and admit defeat."

With truth served, the record righted and my lumps taken, I do, however, reserve the right to parry my correspondent's probing for the source of my misinformation.

Ask of the winds that whistle through a columnist's head when the young year trembles on the brink of spring!

The other day, with all necessary errands accomplished, my wife and I wandered footloose into a downtown haven we have been passing with scarce a glance in recent months.

This is Centennial Square; and a pleasant place we found it on a sunny noon. So did quite a few other people, including a young man who had settled on a bench in a sheltered nook, and was inducing quiet music from a zither for no audience other than himself and some of bright-eyed pigeons.

From a window table upstairs in the McPherson Theatre restaurant, we noted further that the square imposes certain behavioral patterns on its visitors.

Foot-traffic across Douglass Street moves briskly and with purpose. Once into the square, though, the stride becomes a leisurely saunter.

Older folk amble their way to one or other of the benches, with a pause, perhaps, at the fountain, and another to inspect the sunken garden. But the young, usually in twos or threes, rarely concern themselves with a garden or benches.

The fountain area attracts them, and if they sit, it is to perch on the concrete scallops that ring pool, central shafts and busy water-jets.

Some have transistor radios, some cameras. They embellish the scene for a while, then the streets claim them, and until others take their place, the square is left to its strollers and bench-warmer.

There are many reasons why cars crash and people die on our Island Highway, and no doubt they are all valid. But in addition to such factors as come easiest to mind, I think we had better subject that "highway" itself to a searching and intensive study.

I am not an expert on highway construction nor will I pretend to be. But through many trips up and down our north road at varying speeds and in all weather conditions, certain impressions have been forced on me.

First, if ours is to rate as a highway in fact as well as name, it needs to be widened, and in a number of areas between Victoria and Kelsey Bay, re-engineered.

Second, if it is to be travelled at even the legal posted speed, let alone the actual speeds at which it is driven, it demands a car-proof median. What earthly use is a white line on blacktop when from mishandling or mechanical failure, an automobile is swerving out of control?

Add to this, well-lighted bridge approaches, better guard rails, slow lanes, over or under-passes and safety ride will be better served.

To call a road a modern highway doesn't make it one; and surely this fallacy has now been sufficiently demonstrated.

## Wheels Rolling On North Ward Replacement

### Government Approval Given School Plans

Preliminary plans for Blanshard School have been approved by the provincial government.

Greater Victoria School Board chairman Peter Bunn said today the provincial go-ahead will enable the board's architect to proceed with working drawings.

**PROPERTY BOUGHT**

Meanwhile city planner Geoffrey Greenhalgh said property acquisition in the area is proceeding according to plan.

"Agreement has been reached on the price for the first piece of property required for the school site," he said. "We are not anticipating any major difficulties."

Mr. Greenhalgh said he is pleased the school board had been given authority to proceed with working drawings.

"It all goes well they should be just about ready to proceed with construction by the time we have the site cleared," he said.

Naming of the school after Richard Blanshard has drawn criticism from at least one organization.

### RETAIN NAME

In a letter to the school board the North Ward and Quadra Primary Auxiliary Association has asked the new school retain the name North Ward for historical reasons or name the school after the late Mayor A.W. Toone.

Chairman Bunn said the decision to name the school Blanshard had already been made and would not be changed.

## Clear Course On School Vote Asked by Bunn

### Referendum Chances Hurt By Simultaneous Bylaws

Greater Victoria School Board chairman Peter Bunn wants a clear field when a multi-million-dollar referendum goes to the people in April.

A definite date for the referendum seeking approval for expenditures in excess of \$10 million, will be established at a special meeting of the school board tonight.

"I would hope that we can hold the referendum separately from other municipal referendums," said Mr. Bunn this morning. "That is purely a personal observation, but I intend to ask the board tonight to set a date which will keep the school vote well clear of other matters."

### PARKS VOTE

Esquimalt has announced that it will probably go to the people with a parks referendum and possibly with a separate fire-fighting service referendum at the same time as the school board money vote.

"We have found in the past that school referendums can be hurt by other votes taken on the same day," Mr. Bunn said. "I can't speak for the rest of the school board, but I have every hope that they will agree to hold our vote entirely separate."

If approved the multi-million referendum will enable the school board to raise funds for site acquisition, school construction and equipment.

### GAS PRICE PROBE

#### March 10 Deadline

#### On Briefs

A special legislative committee studying gasoline prices today set March 10 as the deadline for receiving submissions from interested parties.

The committee, which will update the Morrow Royal Commission report on gasoline prices handed in last session, elected Herb Capozzi (SC-Vancouver Centre) as its chairman.

Mr. Doney would not accept telephone calls this morning.

It was officially learned that the resignation followed a dispute over the re-hiring of a fair manager. The post had been filled by Mr. Robinson but it was understood that his services terminated some months ago.

The committee will hold its first working session next Tuesday at 10 a.m. as it begins its survey of how far the recommendations of Judge Charles Morrow have been implemented and whether legislation is needed at this session.

His recommendations included divorcing retail service stations from oil company control, lowering gas prices and a five-year moratorium on new service station construction.

### RE-HIRE

It was reported however that while Mr. Doney was incapacitated by illness, the board rehired Mr. Robinson.

Public funds available to the fair by federal and provincial governments and the council of Saanich and Central Saanich total about \$20,000 annually.

The budget of the annual fair, the oldest fair in western Canada (it observes its centenary next year), amounts to about \$40,000.

### NO MANAGER

Some members believe that the 11-man board of directors should administer the association and the fair without a hired manager.

Other controversies of the month involve the condition of the aging fair buildings and the use of fair grounds by a Central Saanich centennial project.

A decision was reached at the meeting to make the fair grounds available to the project. But some sources say a question remains as to who will maintain the museum.

### Roadside Trails Part of Saanich Winter Works

A petition to Saanich council several months ago by horse riders is paying off.

Acting on a public works committee recommendation, council last night approved spending \$1,600 under the winter works program for roadside paths on Mount Douglas Cross Road, Blenkinsop, Lohbrunner and Lochside.

This followed a petition by R.G. Shanks, 4111 Cedar Hill Road, and others who asked for the trails not only for horses, but for hikers, wakers and cross-country runners.

Saanich has also passed an expropriation bylaw to gain 2.03 acres on the west side of Elk Beaver Lake, southeast of the foot of Elkwood.

It provides another link in the right-of-way along this side of the lake. Only two small properties remain on the trail. The right-of-way is the former Victoria and Sidney Railway.

## Vote in Spring On Separate Fire Force

### Esquimalt May Get Three Referendums

Esquimalt taxpayers will vote in March or April on a separate fire-fighting force for the municipality.

At present Esquimalt is served by a combination police-fire-fighting-force which in the past has drawn sharp criticism from various authorities.

A separate fire department has been in the wind since the presentation to the police commission of the Macdonnell report several months ago.

Details of the report have never been released, neither has the commission ever presented the report to full council.

The report was presented after a full investigation of the joint fire-police protection service was made by retired RCMP Supt. C.B. Macdonnell.

### DETAILED STUDY

In the meantime Coun. Gerald Horne, chairman of the fire committee, has been carrying out a detailed study of the fire-fighting service with special attention paid to communities of similar size which operate successful departments on a paid-volunteer basis.

Reeve Bryant said this morning that no specific recommendations had yet been made to council but he indicated that he was expecting some suggestions in the near future.

"If the fire committee has recommendations which they feel should be put to a referendum, and if this is approved by council, then the school board, parks and fire referendums will be held simultaneously," he said.

The parks vote will decide whether Esquimalt will join with other municipalities in the Regional District parks acquisition program.

## 3 TV Sets In Big Haul

About \$3,500 worth of electronic equipment was reported stolen overnight in a break-in at Tele-Tech Services Ltd., 1202 Wharf Street.

Among goods missing is a \$900 color TV set and two \$550 smaller color models.

City detectives said a rear window in the TV repair business had been smashed.

A stock inventory was still underway at noon but other items reported missing included two tape recorders.

## Ask The Times

Q. In the provincial legislature recently Waldo Skillings referred to Dr. John B. Macdonald, president of UBC, as a "lame duck". How come?—W.T.

A. Referring to our legislative reporter's notes after Mr. Skillings admitted on questioning by Alex Macdonald (NDP—Vancouver East) that he was talking about President Macdonald, Pat McGee (Lib.—Vancouver-Burrard) asked "How is he a lame duck?"

"Because," answered Mr. Skillings, "he loses his office June 30."

The term "lame duck" was first applied to a 1933 U.S. Congressional session which was abrogated by constitutional amendment. It is often used for an office-holder, towards the close of his term, who will not return for another term.

Anyone wishing a question answered is invited to send the problem along to the Times, addressed to "Ask the Times" Editor. Questions and answers will be kept anonymous.

All questions should deal with matters of fact and be of general interest. The Times does not undertake to solve problems or give advice. Nor will it attempt to put a value on old coins, stamps or antiques. These should be submitted to a dealer.

## Saanich Likes Plan For Colquitz Fishing

A proposal for turning Colquitz Creek into a youngsters fishing stream was made to Saanich council Monday night.

It was suggested by George Moore and Frank Beebe and received close attention by council, which referred it to municipal engineer Neville Life for a report.

"Instead of being viewed as a drainage ditch, it should be a live flowing stream," said Mr. Beebe. At present the creek was being "engineered to death and it's a crime."

He is organizing the Cross-Canada ride and plans to accompany the horsemen by car.

The scroll will bear greetings of the famed Charros, a horsemen's group in Mexico. It was delivered here in January by Al Legate, who is here to help promote the establishment of permanent riding trails, and recreational riding.

Representatives of Vancouver Island riding clubs will meet

### SHIP MOVEMENTS

HMC Ships Saskatchewan and MacKenzie, on Maple Spring cruise in Caribbean; St. Croix and Yukon arrived in Victoria from Vancouver; St. James Douglas working at Race Rocks and Hot Springs Cove; Racer due in at McKay-Cormack; Stonewall, in port leaves Friday; St. Catharine on Station Papa; Vancouver in port.

### TRANSPORT

Carmell due at Pine Island today, due at Shuswap Bay tonight; working at Pine Island Wednesday; Estevan in port, off load, leaves today; St. James Douglas working at Race Rocks and Hot Springs Cove; Racer due in at McKay-Cormack; Stonewall, in port leaves Friday; St. Catharine on Station Papa; Vancouver and Lohbrunner and Lochside.

This followed a petition by R.G. Shanks, 4111 Cedar Hill Road, and others who asked for the trails not only for horses, but for hikers, wakers and cross-country runners.

Saanich has also passed an expropriation bylaw to gain 2.03 acres on the west side of Elk Beaver Lake, southeast of the foot of Elkwood.

It provides another link in the right-of-way along this side of the lake. Only two small properties remain on the trail. The right-of-way is the former Victoria and Sidney Railway.

## VICTORIA-MONTREAL IN 100 DAYS

## Pony Express to Gallop Scroll to Queen

Vancouver Island horsemen plan to take part in a 100-day centennial pony express ride between Victoria and Montreal.

The first rider will start from the Legislative Buildings here March 22. Hundreds of riders will succeed him, none traveling more than five miles.

Plan of the pony express, a

Mr. and Mrs. Richard Hugh Spilsbury, 2995 Uplands Road, announce the forthcoming marriage of their youngest daughter, Mary Ward Mosley, to Dr. Michael Andrew Ross, second son of Mrs. Andrew Oliver Ferguson Ross, Birkenhead, Cheshire, England, and the late Dr. Ross. The wedding will take place on Saturday, March 18, at 2:30 p.m., in St. Patrick's Church, Oak Bay. Fr. A. E. Leonard will officiate. (Miss Spilsbury's photo by Campbell Studio; her fiance's by Meyer's Studio.)

DEAR ABBY . . .

## 'Sleeping Beauty' Is a Lucky Girl

By ABIGAIL VAN BUREN

DEAR ABBY: You had a letter in your column signed "Sleeping Beauty." She was a bride of two months who complained because her husband got up every morning at the crack of dawn and disturbed her while preparing breakfast for himself. If that's all she ever finds wrong with him, she's lucky.

"Sleeping Beauty" probably doesn't realize that getting up early in the morning is a habit some people can never break. Folks who were raised on a farm had to be early risers. And any fellow who ever had a paper route or a mile run got into the habit of getting up early.

I am now 70, and although there is no reason for me to get up that early, I can't sleep past 5 a.m. to save my neck. So tell "Sleeping Beauty" that if she's really such a "beauty," it's a wonder her husband wants to get up at all.

EARLY BIRD

DEAR ABBY: I can sympathize with "Sleeping Beauty." My husband is another one of those men who doesn't need much sleep. He is up like a rooster at 4:30 every morning.

A few years ago he got up at that ridiculous hour and didn't know what to do with himself, so he got dressed and went down to his store. He got shot in the behind by a night watchman who thought he was a burglar.

### THE BETTER HALF

By Bob Barnes

"Hey, Eddie—there's a guy here who wants something he calls 'two-hour service'."

### SHOPPING GUIDE

## Young Seamstresses' Needs in This Shop

By Penny Saver

My neighbor's living room has been the scene of many a "fashion show" lately. Her young daughter has just begun to create dresses and outfit for her whole family of dolls. All the latest up-to-date styles drap the miniature models that march down her ramp. Many of the upcoming fashion artists and critics from the whole neighborhood gather for these "shows," which usually end up with a healthy game of tag in the backyard, or a cycle trip to another youngster's home.

If your youngster is learning how to sew for her dolls, or if you spend fun-time whipping up items for her doll's wardrobe, you'll need the accessory kit that I found. This kit contains real buttons, tiny and perfect for miniature gowns and ensembles. Buttons are in assorted colors. Not only that, this collection contains metal snaps, hooks and eyes, assorted beads and pearls for the daintiest finishing touches. Another feature is the two 1½ inch zippers you'll find in this sewing kit. There are 36 pieces in each package, selling for 98 cents.

If you do very much sewing yourself, you know the importance of a good, reliable pair of scissors. This shop carries a whole line of shears for every sewing need, right down to cutting patterns, trimming and pinking. The stainless steel scissors are made in West Germany and Brazil. Prices range from \$1.40 to \$3.95.

If you have trouble covering buttons, drop in to this shop and see the self-covering snap-in buttons. These are made of rust-proof aluminum. Fabrics won't wrinkle when you cover these, which sell for 39 cents the package.

Thinking of wrinkles, one trouble spot with some women is a blouse that refuses to stay tucked neatly inside a skirt. I've tried pinning the edges down, but then I've forgotten about the pins and have one frayed blouse as a result. One shop has a gadget that attaches like a garter to blouse ends, and to your nylon at the other end. These elastic wonders stretch as you stretch. Selling for \$1.29 the pair, these are completely washable.

Give me a call at 382-3131 if you want to know where to find these sewing "musts."

## Settlers' Furniture Traditions Form Basis for Canadian Lines

By DINA SUDLOW

The subtle blending of yesterday and today gives a distinctively Canadian personality to a new line of furniture—styled by an award-winning American furniture designer.

Milo Baughman, Wellesley, Mass., was commissioned by a Canadian furniture manufacturer to design a line of furniture "as a tribute to Canada's centennial."

Little more than a year later, Baughman produced "Canadian Classics," a 63-piece collection which has not only the comfort demanded by today's consumer but unique detail and graceful lines found in the furniture of Canada's early settlers.

He was well-equipped to tackle such a project. Baughman, 41, has been a designer all his life and has taught furniture design at the University of California, in Los Angeles. He's also top designer for four furniture manufacturers in the United States. But the best qualification of all, Baughman and his family have long been charmed by Canada, its people and its traditions.

President of the company who commissioned the collection, J. William Stack Jr., says that Baughman was selected "not only for his outstanding ability as a designer but for his objectivity. Not being Canadian he can detect particular characteristics which we as Canadians take for granted and don't notice."

Baughman found that designers and decorators in Canada tended to pay little attention to their country's early furniture styles and concentrated on contemporary and imported period pieces in their work.

He found that they generally thought of early Canada

in terms of log cabins,

primitive surroundings and a

life without refinement. In

actual fact, the designer was

surprised with the amount of sophistication in pioneer days, for settlers often had aristocratic backgrounds and gave their country furniture a sophisticated and civilized flair.

To evolve the collection, Baughman had to research. He toured the country, talking to historians and experts on early Canada, read hundreds of historical documents dealing with the home life of the early settlers, and built up a library of rare books on early Canadian furniture. He also enlisted the help of, among others, Jean Palardy, a leading Canadian art historian and author.

### SUBTLE BLENDING

Throughout his tour, Baughman noticed the blending of old and new in Canadian architecture and art, and also discovered a feeling of boldness and aggressiveness in Canadian people. As he put it then, "Something has happened in Canada in the last decade which gives the Canadian a genuine enthusiasm for the spirit of progress."

So he incorporated this feeling of today with a look back into history into his designs.

Baughman found that designers and decorators in Canada tended to pay little attention to their country's early furniture styles and concentrated on contemporary and imported period pieces in their work.

He found that they generally thought of early Canada

in terms of log cabins,

primitive surroundings and a

life without refinement. In

actual fact, the designer was

surprised with the amount of sophistication in pioneer days, for settlers often had aristocratic backgrounds and gave their country furniture a sophisticated and civilized flair.

In the new collection can be seen certain details which are uniquely Canadian. Some types of chairs have a peculiar curve to the arm, similar to those found in early French Canadian design. The old slat-backs of chairs now form bed headboards. A particular shade of red used by early settlers to accent their furniture can be seen as color detail throughout the collection.

Baughman even included the Eskimo in his designs, producing a small "cube" which could be used as a chair, table, attractive storage box, or simply a conversation piece. Practically made of slate and formica, the box sides feature an exciting Eskimo motif in black and white.

The furniture is built for practicality — a compact mobile server has drop-leaf sides permitting easy storage. The extra leaves of a small coffee table can fit a small space yet expand through a drop-leaf and gate-leg detail.

Armoires present a uniquely Canadian carved front, yet when opened reveal cupboards on either side. The cutlery drawers are sectioned and lined, the two front doors fold down.

Award-winning designer Milo Baughman is seen with one of the most practical pieces in the 63-piece Canadian furniture collection which he styled. Compact and attractive, the server can be expanded by the dropleaf sections on either side. The cutlery drawers are sectioned and lined, the two front doors fold down.

wood. The upholstered surface features as many colors as could be found in a Canadian rainbow! Fabrics

and patterns number more

than 300.

Baughman has produced furniture which reflects Canada today, with its look for today with an eye to the past. And he's probably the only American to have furniture "a la Canada" in his home.

### Given at Annual Meeting of Aldyen Hamber Chapter

## SERVICES' CENTENNIAL PROGRAM

Music, sound, color and lights are the main ingredients which will make up the gigantic Military Tattoo, planned by the Canadian Armed Forces to mark Canada's centennial year.

A detailed outline of the huge celebration was given by Capt. Dennis Ryan, RCA, when he spoke to the annual meeting of Aldyen Hamber Chapter, IODE, Wednesday evening, in the Executive House small banquet room. He told the group that special musical and lighting effects had been arranged for the event which will incorporate 1,700 performers in 3,200 roles. Twelve sets will be used for the two-hour performance which will show Canada from 300 years ago until today.

Capt. Ryan, armed forces public relations officer, showed slides of the sets, which began with a fort scene "which could have been anywhere in Canada 100 years ago."

Glancing back to the early French and English garrisons and moving forward to modern day, the military story will be told in music, song and narrative by massed bands, chorals groups, dancers, gymnasts, and in military drills, each musical arrangement taken from the period of the set. Examples of the music were heard by tape-recorder during the slides.

TRANSCANADA TOUR

To tour Canada, Capt. Ryan told the chapter the show would be split to travel on two trains, each capable of presenting the full tattoo. One train would cover northern areas—the other south, each arriving in cities at the time of their particular celebrations. The trains will meet in Vancouver for the first stadium show in May, and will also be featured at Expo 67.

In Victoria, the forces will present a Navy assembly as part of the centennial celebrations, featuring ships from all over the world. It will be held at Esquimalt on July 13. The Golden Centennaires, the air force flying team, will stage two performances that day, said the speaker.

For the Victoria Day parade on May 22, the army's motor cycle display team will perform. During the centennial year, Capt. Ryan said, the armed forces will also "bolster community activities, providing honor guards, vehicles and assistance with community projects." He was introduced by Mrs. Margaret MacNeil and thanked by Mrs. J. A. Dunn.

Educational secretary Mrs. S. White reported a successful year in her department with a total disbursements being \$548.90. Books, magazines and other supplies had been presented to the adopted school at Telkwa and to the Handicapped Children's Clinic and the university.

In her report, services con-

vene Mrs. R. Haywood said that \$150 had been given to the Handicapped Children's Clinic and the university.

Among major fund-raising events were the fashion show presented by the Adult Division of Greater Victoria School Board sewing classes and a Christmas raffle, held jointly with Navy League Chapter.

Members provided coffee for night school sessions on Tuesday and Thursday evenings at Oak Bay Junior Secondary School.

Reports were also given by standard bearer, Miss Margaret Dodimead; Echoes, Miss MacNeil; public relations, Mrs. N. Harris; commonwealth relations, Mrs. H. McClung; immigration and citizenship, Mrs. Barnes. The world affairs report of Mrs. A. Moore was read by Mrs. Dunn.

Retiring regent Mrs. J. H. Dalgleish introduced special guests: Municipal regent Miss Christine MacNab, and municipal organizing secretary Mrs. Peter Bell. The latter conducted the induction ceremony for Mrs. R. H. Howard, a former member of Elizabeth Kelly Chapter in New Westminster.

Miss MacNab installed the officers which included: Regent, Miss MacNeil; first vice-regent, Mrs. Barnes; second, Mrs. Dunn; secretary, Mrs. White; treasurer, Mrs. Charles Medley; educational secretary, Miss Dodimead; Echoes, Miss Campbell; services, Mrs. Dalgleish; standard bearer, Mrs. Gerald H. Cross; Councillors are Mrs. Rita Holmes and Mrs. George R. Laird.

Honorary regent Mrs. Eric MacLaren, for whom the chapter is named. Unable to attend the meeting, she donated a cheque for \$100.

### CLUBWOMEN'S NEWS

Fashion Show — Plans were discussed for the annual bazaar tea and fashion show of St. Margaret's School Old Girls' Association when the group met recently in the Rainbow Room home of Mrs. J. F. Breuker. The show will be held on Saturday, March 4 from 3 to 5 p.m. in the home of Mrs. Reg. Wilde, 1039 Beach Drive. Mrs. H. L. Ramsey will convene the event and fashions will be from Eaton's. Attending the meeting were Mrs. Ramsey, Mrs. J. Alexis, Mrs. H. Graham, Mrs. D. S. Ruth and Miss Lynne Connell.

New Officers — Mrs. M. Smith was installed as president of the Ladies' Auxiliary to Esquimalt Branch No. 172, Royal Canadian Legion, when the group met recently in the legion hall. Other new officers are Mrs. H. Muse, first vice-president; Mrs. M. Glover, second; Mrs. B. Bust, secretary; Mrs. A. Moor in a man, treasurer; Mrs. E. Graham, social convener; Mrs. G. Richardson, sergeant-at-arms; Mrs. O. Dugdale, sick and visiting; Mrs. A. Ireland, standard bearer, and Mrs. L. Phillips, membership. District representative of Pacific Command Mrs. M. Woodward conducted the installation.

Centennial Project — Plans for financing off-the-street parking at St. David's Church-by-the-Sea were discussed as a possible centennial project by the church's Women's Guild at a recent meeting in the vicarage. It was also mentioned that the group may in time, with the municipality's co-operation, arrange draining and filling of the church property adjoining the vicarage lot. Woman's Auxiliary president Mrs. N. W. Life invited members to attend Holy Communion on St. David's Day, March 1 at 10 a.m., to be followed by refreshments and Welsh singing. H. Palin will sing slides of Great Britain on March 3 in the church hall, beginning at 8 p.m. Refreshments will be served. A series

of cottage meetings to be held through Lent was discussed, and tentative plans were made for the annual spring tea and sale on April 15. Details will be arranged at the next meeting.

Following the meeting Mrs. H. Gordon Walker served tea. A guest was Mrs. F. Findlay. St. Luke's Church, South Burnaby.

Gives Parties — Mrs. H. F. Jarvis reported that four birthday parties had been given for patients during the past month when the Women's Auxiliary to the Veterans' Hospital met recently. Mrs. Ralph Cooley was appointed convener of the Centennial Dogwood Festival, to be held on June 21. Mrs. J. Lewis reported that 450 library books had been distributed to bed patients by auxiliary members.

It was also announced that Mrs. J. K. Murray, assisted by Mrs. D. MacPhail and Mrs. J. R. Scott, had visited 257 patients, distributing cigarettes and comforts. President Mrs. F. R. Roberts welcomed a new member to the group.

### WHY GROW OLD?

By JOSEPHINE LOWMAN

#### It's Good Trick to Know How to Roll Your Hair

Many women have their hair done professionally all of the time. Many more indulge in a do-it-yourself job all of the time. Others do their best to bring a deteriorating hairstyle back into shape only in times of emergency when they cannot get to a beauty salon. Anyway, it is a good trick to know how to roll your hair, when you want to, for any reason. The section you are going to put on a roller should be smooth. Then take hold of the hair at the ends with two fingers. Lift the hair until it is straight from the roots to the ends. Pull slightly in the opposite direction from that in which you are going to wind it. This will lead to breakage and eventually to thinning hair.

If you are concerned because your hair is falling out, you may want my booklet 'Is Your Hair Thinning?' If so send 15 cents and a stamped, self-addressed envelope with your request. Address to Josephine Lowman in care of this newspaper.

Thinking of wrinkles, one trouble spot with some women is a blouse that refuses to stay tucked neatly inside a skirt. I've tried pinning the edges down, but then I've forgotten about the pins and have one frayed blouse as a result. One shop has a gadget that attaches like a garter to blouse ends, and to your nylon at the other end. These elastic wonders stretch as you stretch. Selling for \$1.29 the pair, these are completely washable.

## Ignorance Was Bliss and Won Barbara Bryne Her First Award

By PAT DUFOUR

It has often been said that no actor or actress can really make a success of a role unless he or she is able to completely submerge into the on-stage character and become that personality. Barbara Bryne unwittingly exploded that theory when she was 16 and has a trophy to prove it!

The diminutive actress — she barely reaches five feet — is here as a member of the Stratford Festival Company this week I couldn't help thinking that I was with Jessie Matthews, the English star who kept me stage-struck when I was hardly big enough to crawl into a theatre seat. She has the same puckish look and large brown eyes that kept the great star's audiences

## LOVES TO SING

I'd like to hear her sing. I have a suspicion that Barbara may also be blessed with the soprano voice that helped put the Matthews name up in lights. At any rate, she admits that at one time, she had plans to try out for opera and loves nothing more than a good singing role in a revue.

"I was assigned the role of Pompey in "Measure for Measure" by our instructor, Fabia Drake. As you know, he was one of the bawdiest characters that Shakespeare ever created. At that age, I didn't have a clue what he was all about."

"Miss Drake told me to 'Dig, Dig, Dig!' when I told her that I couldn't understand Pompey. I threw a lot of extra stuff into the part and I suppose, my naive ad-libbing must have been right on the nose. At the end of the performance, Athene Syler presented me with the John Gilbert Trophy which is given to the most promising female student."

It wasn't until two years later that Barbara's ears began to do a slow burn when she discovered the character she'd been portraying. "I felt terrible, both my parents were in the audience and I often wondered what they must have thought of it all."

Word that the 40-year-old Queen was confined to bed with acute gastro-enteritis came as the 170 men and women to be honored gathered at the palace.

The Queen never before has had to miss an investiture because of illness.

When she has been overseas or pregnant, senior members of the Royal Family deputized for her.

But today Prince Philip was in Jordan, the Queen Mother

and revues and still a little nostalgic about the pantomime roles she "cut her teeth on" in England.

If there is one weak link in her ability to assume any role it lies in her failure to absorb the intricacies of the business world.

With an elfin grin she admits that her training in a technical school which she attended before going to the academy was a "dismal failure" and hastened her decision to train for the theatre.

"I took shorthand and typewriting and it ended up as a complete disaster. I got zero out of 100 for the first subject and the same rating for the other. I typed the exam on the wrong set of keys and my paper ended up looking like an exercise in Welsh!"

Frank DeGroot was best man and ushering the guests were brothers of the principals, John Jenkins and Gary Evans.

The bride's paternal grandmother, Mrs. F. H. Jenkins made the three-tier wedding cake which centred the head table at the reception following in Chez Marcel. The centrepiece was decorated by A. Harwood. Arrangements of tulips and white candles completed the decorations.

During the reception Maurice Clayton sang "My Best to You" and Bill Price proposed the toast to the bride.

The couple will make their home at 3176 Glen Lake Road, following a honeymoon trip up Islands. For travelling, the new Mrs. Evans donned a tweed suit in green tones, which she accented with dark brown accessories and a gardenia corsage.

## QUEEN IS SICK

## Last-Minute Substitute For Royal Investiture

LONDON (Reuters)

A digestive upset laid the Queen low today and sent Buckingham Palace officials into a tizzy as to who should take her place in handing out honors and medals bestowed at the New Year:

The Queen was sorry, he said, "but her doctors will not allow her to get up this morning."

He added that there would be a short delay in beginning the investiture, as the Duke of Kent was still on his way to the palace from out of town. He finally got there.

Sir Ronald Bodley Scott, the Queen's physician, saw her today.

The senior palace functionary, the Lord Chamberlain, broke the news to those about to be honoured.

He added that there would be a short delay in beginning the investiture, as the Duke of Kent was still on his way to the palace from out of town. He finally got there.

Sir Ronald Bodley Scott, the Queen's physician, saw her today.

The senior palace functionary, the Lord Chamberlain, broke the news to those about to be honoured.

The Queen was sorry, he said, "but her doctors will not allow her to get up this morning."

He added that there would be a short delay in beginning the investiture, as the Duke of Kent was still on his way to the palace from out of town. He finally got there.

When she has been overseas or pregnant, senior members of the Royal Family deputized for her.

But today Prince Philip was in Jordan, the Queen Mother

was convalescing after an abdominal operation, and the Duke of Gloucester was vacationing in Jamaica.

The 31-year-old Duke of Kent was called in to stand in for the Queen.

The senior palace functionary, the Lord Chamberlain, broke the news to those about to be honoured.

154 PROPERTY FOR SALE

SEVENTH HEAVEN

110 Acres At City's Front Door

MOUNTAIN AND SKY

Hills, Valleys and Vales Try Cash Try Trades Try Anything

It is hard to believe that so close to Gutz, a hop, skip and a jump from the Columbia River, there is still 110 acres beautifully treed with a lake plus a few miles of road beds. Comprised of two sites, one being a hillside overlooking the two road frontages with hydro to the property also the lower 40 acres is a valley. This is a place you can probably share in the ease of private living on Latoria Rd. If you are interested in a piece of land and a mountain, with 3 reinforced concrete buildings on the lot, these could be the silent, peaceful surroundings you are looking for. The strata, Esquimalt harbour and all across the city are visible. This is a place that is worth the price of the land alone. Vendor will sell one 50 acre parcel with option on other 60 acre parcels. Currently some properties can be bought with option on adjacent 50 acre plot. Options give you time to consider the options. This is a conservationist and has retained the lovely trees and has not ruined the land. All the trees that there were in heaven with Victoria as a suburb. This is to be encouraged and visited by all. Victoria is growing co-operative asking \$30,000 down on whole tract which can be by cash or trade or any commercial revenue giving you a 10% return. One will have unique properties you wish to advertise EXTENSIVELY. Call F. Wills for advice. F. Wills &amp; Co. Ltd. 706 Fort Street.

## COLD VICTIMS

### Chills Not Too Serious

CHICAGO (AP) — If you're worried about catching a cold or recovering from one, don't add to your worries, if you get chilled — it doesn't seem to make any difference.

That's the finding in a new study reported today in the Journal of the American Medical Association.

The experiment indicated that chilling under normally-encountered conditions has no effect on the common cold.

Three investigators from the National Institute of Health subjected 43 volunteers to a variety of presumed cold-catching situations.

Some persons spent 1½ to 2½ hours in a room with the temperature hovering around 40 degrees — the sort of short-term chilling commonly believed to bring on a cold.

Others were placed in cool baths which lowered their body temperatures associated with some viral and bacterial infections.

#### EFFECT SMALL.

Despite exposure to low temperatures, the volunteers didn't catch significantly more colds than a control group which stayed warm and dry.

When some persons in both groups were inoculated with cold-causing rhinoviruses, the illness rate was slightly higher among cold-exposed volunteers. But more members of the control group developed fever than did persons exposed to cold.

Effects of cold temperatures during the course of a cold also was studied. Three persons were immersed in cold baths for two to four hours at the height of their colds. The course of their illness didn't seem to differ from that of the other persons studied.

The final test was of exposure to chilling during recovery from a cold. In this stage, viruses still are present in the nasal areas but the subject appears to be well. Thirteen volunteers went into the cold room or cold bath for this experiment.

One cold-exposed man had a one-day relapse in his recovery. There was an increase in viruses shed by one cold-exposed volunteer, but also an increase in those shed by one member of the control group. Virus shedding, which is a lessening in the viral population of the nasal passageways, is an indication of a coming cold or that a cold is cured.

The studies were conducted by Dr. R. G. Douglas Jr., and Dr. R. B. Couch, now both of Baylor University College of Medicine, and K. M. Lindgren of the National Institute of Health.

### Three Deer For Archers

Fish and wildlife officers checked 32 bow-twanging hunters on Vancouver Island last year.

The checks showed the archers' total bag for the year was three deer.

### The Wonderful World of Animals

By DR. FRANK MILLER

DEAR DR. MILLER: She's a four-year-old Beagle. Her name is Taya. And she is very overweight. The doctor told us to cut down her food to a reasonable amount, which we've done. He also told us to give her all the exercise she can stand. That's the problem. She can stand a lot more than we can. We tried taking her out for long walks which turn out to be mostly runs. The walks get longer each day, and Taya gets stronger. We're fading fast, but so far she hasn't lost a pound. What can you suggest? — B.C.

DEAR B.C.: Hide or walk, but don't run, back to your veterinarian and let him recheck Taya. If she's holding up as well physically as is apparent, he may suggest added forms of vigorous exercise — for her — such as ball-chasing. Apparently she's a poor loser, so a stricter diet and (or) specific medication for weight loss may also be indicated.

DEAR DR. MILLER: Do a pair of Nyasaland Love Birds (I call them Jack and Jill) need a nest box like parakeets? I have never bred these before and am anxious to try. I have bred parakeets before with no trouble. — F.P.

DEAR F.P.: Love Birds (as might be suspected) are comparatively easy to breed but unlike parakeets, they won't settle for an unadorned prefab honeymoon cottage. While they will accept a nest box 6" wide by 6" deep by 12" high, they like elaborate furnishings with small twigs, fresh bark or straw.

DEAR DR. MILLER: Does a Java rice bird eat meat? I've never tried to feed mine any, but someone has suggested it. Mine get all the grains. — S.E.

DEAR S.E.: Most finches are healthier if they have a little extra protein occasionally. This offering may be anything from fresh fruit fly to mealworms to beef. (The beef should be bite-sized, of course.)

DEAR DR. MILLER: I have heard that fruit flies can be raised at home and make good aquarium food. Is this so, and where can I get them, if they do? — G.A.

DEAR G.A.: Yes. Drosophila do make very acceptable fish food. Best bet for a supply is to order from a biological supply house. They will provide instructions plus a starter culture of the "free"-winged variety. (These flightless flies must leg it to freedom, so their recapture in case of a break-out is considerably easier.)

DEAR DR. MILLER: Do a pair of Nyasaland Love Birds (I call them Jack and Jill) need a nest box like parakeets? I have never bred these before and am anxious to try. I have bred parakeets before with no trouble. — F.P.

### ASK ANDY

Is there something you want to know? Do you want to win a set of valuable books or other instructive prizes? Then ask Andy.

Andy will answer questions submitted by child readers and those who submit the questions he selects to answer will receive the prizes.

The youngster who asks the first question answered each day receives a 20-volume set of the World Book Encyclopedia to Jerice Beterman, age 13, of Boise, Idaho, for her question:

Does a talking parrot have an extra large brain?

All birds have small, streamlined heads and small brains inside their small skulls. A silly person is sometimes called a bird brain because he or she appears to be limited in the good sense department. A pet parrot seems to be a very sensible character. He has the good sense to cope with life in captivity and enjoy it. His bright round eye watches whatever his human friends are doing with great interest. Then he cocks his head so that the eye on the other side can get a different slant on the situation. Watching him, you might think that he is forming an original and quite scholarly opinion. When he speaks, you feel quite sure that he is the brainiest of birds. "Polly wants a cracker!" he says, loud and clear. You give him a cracker, he accepts it and starts to nibble.

By now you are sure the Pretty Polly knows exactly what he is talking about. But if you knew him better, you would realize that this is not so at all. He is likely to say, "Polly wants a cracker," even when he has a cracker in his claw and six others in his cage. The truth is that no talking bird understands what he says or what you say. Of course, like any pet, he senses tender affection in your words — but he has no idea what they mean.

Perhaps you can understand his parrot mind if you try to put yourself in his place. At some time in your life, no doubt you have failed to pay attention when someone is talking. You hear the sounds, chatter-chatter, but your wandering mind misses the meaning. For you, of course, this is a lapse and your human brain can and usually does do much better. But the brain of a parrot cannot.

#### Raven Clever Bird

Birds, with their little bird brains, are smart enough to cope with all kinds of problems that concern them. They can even learn from a patient human teacher. But many other animals are better than the birds at learning from human instructors. In this department, the birds are outsmarted by squirrels and pigs, cats and dolphins and the great apes. However, they rate much higher than the snakes, the fish and the worms.

For his size, the parrot has a normal-sized brain. And he is not the best learner of the bird world. The champ is thought to be the raven, a glossy, black smarthy who has been taught to count to seven and solve a few simple problems. Chickens can also learn to count. There is not much difference between the size of their brains and that of the parrot. Pretty Polly is not a champion counter or problem solver. But as an imitator, his talents are astounding and sometimes downright dazzling.

Only a few talking birds learn to parrot a human word without help. As a rule, Pretty Polly is taught by a very patient human friend. Sometimes a cover is put over his cage during the lessons. The phrase for him to learn is repeated again and again, in exactly the same tone. At last, usually at long last, he repeats it. The lesson is now thoroughly learned and for the rest of his life he will repeat it whenever it pops into his feathered head.

#### What exactly is a chicken's gizzard?

The chicken's gizzard is a firm little fist that helps to digest her food. She has no teeth with which to chew and so she must swallow each bit in a whole gob. Her tummy cannot digest whole gobs of food and the lumps must be mashed and bashed to soft pulp. Most of this work is done by the gizzard. This tough little fist is very hard and strong but it has no bones. It is really a very strong muscle.

When the gizzard is full of chicken food, it grinds and squeezes, pinches and twists. But chicken food is often seeds and seeds are hard. The gizzard needs a little extra help to grind them to mushy pulp. So the chicken swallows a few gritty pebbles along with her snacks of grain. They go down with her food in the grinding gizzard. Their jagged edges slice and tear up the food and help the tough little fist to mash it to pulp.

The highest point in Antarctica is the Vinson Massif of the Sentinel Range, 16,860 feet, first climbed in December, 1966.

## Separatism Boiling Up Into Fracas

By JOHN MIKA  
Legislative Reporter

The burgeoning debate over the provincial cabinet's attitude towards Confederation is expected to grow more heated today with the soft-spoken echo of the word "treasonable" still in the air.

The controversy, rapidly escalating into a dominant argument of the session, was intensified Monday as Alan Macfarlane (L—Oak Bay) demanded the government stop its kite-flying and reveal its "reasons for throwing up this incredible smokescreen of separation."

Then he touched off a brief outburst while winding up the budget debate for the Liberal party.

"To treat the threats seriously would be to accept the fact that this government is guilty of treasonable motives, a lack of patriotism, and of a desire to divide Canada and fracture Confederation," he said.

A chorus of "absolute nonsense" and "ridiculous" burst from the Sacred benches.

### Daily Doses

"I agree it's nonsense," he shouted back, "but it has been spoken by your premier and by your cabinet and we've been getting this absolute nonsense every day."

Premier Bennett's spending estimates—including his salary vote which is the traditional juncture of opposition members to zero in on his policies—is slated to come up at today's sitting.

There were suggestions Monday that the demand for a government statement on reasons for it will be continued by the opposition.

### Very Shallow

Snapping back at laughter greeting his speech, Mr. Macfarlane said Sacred backbenchers were "very shallow if they don't think this subject is serious."

"Are these fellows," he said pointing at the backbenchers, "going to ride out of Confederation on the coattails of the premier as they rode into office?"

John Tisdale (SC—Saanich Islands) interjected "we'll ride a Liberal jackass."

"I'll pay no attention to the bray from Saanich and the Islands."

Mr. Macfarlane said he preferred to believe that the government's motives were political bluffing to divert attention from its own failings.

### Playing Politics

"Because I have to have some faith in the sanity of this government, I find it difficult to avoid the irresistible conclusion that this government is playing politics when it should be promoting patriotism," he said.

"It is that this government is so totally committed to the cost of the two power projects that they have to find a whipping boy to blame for the lack of

District Attorney Jim Garrison has promised he will arrest persons connected with Lee Harvey Oswald in an alleged conspiracy to kill Kennedy.

Long told newsmen that Garrison has kept him informed about the general situation of the New Orleans investigation.

"I think he has something that the Kennedy report does not have," Long said.

Long said that Garrison had arrested a person he thought to be involved in an assassina-

## U.S. PLANES TAKE 'BIGGEST BAG' OF WAR

\* SAIGON (AP)—United States pilots today reported their biggest bag of North Vietnamese convoy traffic in months, claiming 86 trucks destroyed or damaged as they headed south with supplies.

In South Vietnam, widespread but small ground actions were reported Monday, with American forces reporting 266 Communist soldiers killed and South Vietnamese troops claiming 76 more Communists killed in five engagements.

**SINGLE WREATHS** mark graves of U.S. astronauts Virgil Grissom, left, and Roger Chaffee today in Arlington National Cemetery in Washington. Today is the day the two, together with Edward White, were scheduled

to be launched into orbit in their spacecraft Apollo 1. A fire in the craft on January 27 killed the three men as they practiced for their mission. White's body is buried at the West Point Military Academy.

# CS Strike Rights Given Approval

## Commons Passes Bargaining Bill

OTTAWA (CP)—Canada's biggest employer took a giant step forward Monday with passage of legislation in the Commons heralding a new era of labor-management relations in the federal service.

Greatest change embodied in the three bills affecting some 200,000 government employees is a provision for collective bargaining with the optional right to strike.

The bills do three things:

Establish a bargaining system;

revamp the Civil Service Act in

keeping with the bargaining

system and modernize it to set

out new conditions of employ-

ment in areas such as political

freedom, and amend the Finan-

cial Administration Act to

set out the treasury board's new

role as management in the bar-

gaining system.

### ROLE CHANGES

The role of the civil service

commission—renamed the pub-

lic service commission—as the

independent agency responsible

for recruitment, promotion,

classification and the body

that recommends salary and

wage levels, changes drastic-

ly.

It retains its recruitment and

promotion role but loses the

other functions in whole or in

part.

The treasury board, a cabinet

committee headed by Revenue

Minister Benson as president,

assumes the role of manage-

ment in bargaining and takes

on the task of classifying a

job's worth. Salaries become

the subject of bargaining.

The number of employees af-

fected by the new system jumps

to 200,000 from less than 150,000

under present provisions of the

Civil Service Act with inclusion

of some 50,000 hourly-rated

employees.

These employees had been

subject to appointment by pa-

tronage. Now, through delega-

tion of hiring authority by the

commission to deputy heads of

departments, it is hoped most

of the patronage will vanish.

### WILL IT DIE?

Richard A. Bell (PC—Carle-

ton), former citizenship minis-

ter who represents an Ottawa

riding, was worried that patron-

age won't stay dead.

He had interviewed more

than 16,000 persons seeking pa-

tronage appointments between

1957 and 1963 when he was a

minister. Although welcoming

negotiations that failure to ha-

ve a treaty will involve the dan-

ger of nuclear war.

### IN A MESSAGE TO THE COM-

MITTEE, he said he hopes it will

soon get a draft of a proposed

treaty.

"I have instructed our nego-

tiators to exercise the greatest

care that the treaty not hinder

the non-nuclear powers in their

development of nuclear energy for

peaceful purposes."

West Germans have been

most outspoken in charging that

present proposals for a treaty

might hurt their nuclear in-

dustry.

The 17 nations participating in

the conference hope to have the

treaty ready by the last week in

September when the UN Gen-

VICTORIA, B.C., TUESDAY, FEB. 21, 1967—PAGE 15

## Arthur Mayse

Just often enough to remind me that memory is fallible and that references should be checked, some lynx-eyed reader catches me in error. So be informed that English novelist George Orwell did not die a suicide as I told you here last Thursday, but was removed from life by tuberculosis.

This information comes from University of Victoria student Hamar Foster, who

did a check, and promptly ran me to the end of a limb.

"In all his major writings and speeches," Mr. Foster points out, "especially '1984' and

'Animal Farm', Orwell is warning us of a future that we must constantly and consciously resist in every aspect of life. For such a man to commit suicide would surely be unthinkable; he would be denying the very humanity that he wished to save from totalitarian control should he take his own life and admit defeat."

With truth served, the record righted and my lumps taken, I do, however, reserve the right to carry my correspondent's probing for the source of my misinformation.

Ask of the winds that whistle through a columnist's head when the young year trembles on the brink of spring!

\*

The other day, with all necessary errands accomplished, my wife and I wandered footloose into a downtown haven we have been passing with scarce a glance in recent months.

This is Centennial Square; a pleasant place we found it on a sunny morning. So did quite a few other people, including a young man who had settled on a bench in a sheltered nook, and was inducing quiet music from a zither for no audience other than himself and some of bright-eyed pigeons.

From a window table upstairs in the McPherson Theatre restaurant, we noted further that the square imposes certain behavioral patterns on its visitors.

Foot-traffic across on Douglas Street moves briskly and with purpose. Once into the square, though, the stride becomes a leisurely saunter.

Older folks amble their way to one or other of the benches, with a pause, perhaps, at the fountain, and another to inspect the sunken garden. But the young, usually in twos or threes, rarely concern themselves with a garden or benches.

The fountain area attracts them, and if they alight, it is to perch on the concrete scallops that ring pool, central shafts and busy water-jets.

Some have transistor radios, some cameras. They embellish the scene for a while, then the streets claim them, and until others take their place, the square is left to its strollers and bench-warmer.

\*

There are many reasons why cars crash and people die on our Island Highway, and no doubt they are all valid. But in addition to such factors as come easiest to mind, I think we had better subject that "highway" itself to a searching and intensive study.

I am not an expert on highway construction, nor will I pretend to be. But through many trips up and down our north road at varying speeds and in all weather conditions, certain impressions have been formed on me.

First, if ours is to rate as a highway in fact as well as name, it needs to be widened, and in a number of areas between Victoria and Kelsey Bay, re-engineered.

Second, if it is to be travelled at even the legal posted speed, let alone the actual speeds at which it is driven, it demands a car-proof median. What earthly use is a white line on blacktop or mechanical failure, an automobile is swerving out of control?

Add to this, well-lighted bridge approaches, better guard rails, slow lanes, over or under-passes and safety will be better served.

To call a road a modern highway doesn't make it one; and surely this fallacy has now been sufficiently demonstrated.

## SWAN Not Ready for SONG

By DON VIPOND

It was a fly-by-night flight that got fouled up.

The first word came from a motorist who nearly put his car in the ditch early this morning when Susie, a grounded swan, jumped out at him from a roadside ditch at Beaver Lake Park.

The shaken driver told police and they told the SPCA. Nobody told Susie anything, so she just sat in the weeds, glaring at the passing traffic.

Along came SPCA Inspector Christian Freeman with a big net. One swish and Susie was bagged but she proved quite an armful, ready to stick her neck way out in a mopping flight for freedom.

It was a tough fight but Mr. Freeman finally managed some sort of wing lock on spitting-mad Susie and away she went for a check-up at the animal shelter.

Inspectors Wesley Des Jardins and Freeman found no injuries besides Susie's wounded pride. The only thing needing repair was her disposition.

Susie probably crashed into a telephone wire or TV aerial and collapsed beside the road to recover, concluded Mr. Des Jardins.

She was able to walk later in the morning but most ungrateful over the day's rest she'll get at the shelter.

Susie is to be released on Beaver Lake Wednesday. She'll be looking for the dirty bird who led her astray.

Saanich police said Monday items worth over \$300 were taken in a house break-in reported last week.

Among goods missing from the home of E. E. Stevens at 634 McKenzie were a rifle and shotgun, binoculars, fishing equipment and a diamond ring.

The owner of the house has been away.

Thieves forced open a bedroom window to get in. A neighbor reported the break-in last Wednesday.

### School Concert At Gordon Head

Students of Gordon Head Jr. Secondary will hold a variety concert tonight at 8 at the school, featuring the band and choir and several specialty acts.

The production is called "Again!" because "we have one every year," a teacher explained.

\*

Vancouver Island horsemen, a small system made famous in

### Saanich Likes Plan For Colquitz Fishing

A proposal for turning Colquitz Creek into a youngsters fishing stream was made to Saanich council Monday night.

It was suggested by George Moore and Frank Beebe and received close attention by council, which referred it to municipal engineer Neville Life for a report.

"Instead of being viewed as a drainage ditch, it should be a flowing stream," said Mr. Beebe. At present the creek is being "engineered to death" and it's a crime."

The creek needed holding pools, gravel spots and less straightening-out to make it longer, he said.

In other business, council

• Approved hiring a temporary planner to resurrect the Douglas Street urban renewal study.

• Agreed to meet Ten-Mile Point residents on 8.7 acres of potential park off Sea Point Drive March 4 after hearing a protest at consideration of selling some of it in exchange for other land.

The creek needed holding pools, gravel spots and less straightening-out to make it longer, he said.

He is organizing the Cross-

Canada ride and plans to accompany the horsemen by car.

Representatives of Vancouver Island riding clubs will meet

## Wheels Rolling On North Ward Replacement

Government Approval Given School Plans

Preliminary plans for Blanshard School have been approved by the provincial government.

Greater Victoria School Board chairman Peter Bunn said today the provincial go-ahead will enable the board's architect to proceed with working drawings.

Blanshard School, to be built as a replacement for the old North Ward School, will be located near the intersection of Quadra and Kings.

### PROPERTY BOUGHT

Meanwhile city planner Geoffrey Greenhalgh said property acquisition in the area is proceeding according to plan.

"Agreement has been reached on the price for the first piece of property required for the school site," he said. "We are not anticipating any major difficulties."

Mr. Greenhalgh said he is pleased the school board had been given authority to proceed with working drawings.

"If all goes well they should be just about ready to proceed with construction by the time we have the site cleared," he said.

Naming of the school after Richard Blanshard has drawn criticism from at least one organization.

### RETAIN NAME

In a letter to the school board the North Ward and Quadra Primary Auxiliary Association has asked the new school retain the name North Ward for historical reasons or name the school after the late mayor A. W. Toome.

Chairman Bunn said the decision to name the school Blanshard had already been made and would not be changed.

### Fair Board Leader Quits After Fracas

The president of North and South Saanich Agricultural Society resigned at a tempestuous meeting Monday night.

The resignation of Albert Doney of 1748 Mount Newton Cross Road shocked many district supporters of the annual Saanichton Fair.

Mr. Doney has headed the farm association for more than 15 years.

### SHOUTING MATCH

Details of the meeting, which some sources classed as a shouting match, were scarce.

An official of the society, Henry Robinson of Valley View Farm, 5649 Wallace Drive, would only state:

"Nobody has been authorized to make any statement because Mr. Doney has been asked to reconsider."

Mr. Doney would not accept telephone calls this morning.

It was officially learned that the resignation followed a dispute over the re-hiring of a fair manager. The post had been filled by Mr. Robinson but it was understood that his services terminated some months ago.

### RE-HIRED

It was reported however that while Mr. Doney was incapacitated by illness, the board re-hired Mr. Robinson.

Public funds made available to the fair by federal and provincial governments and the council of Saanich and Central Saanich total about \$20,000 annually.

The budget of the annual fair, the oldest fair in western Canada (it observes its centenary next year), amounts to about \$40,000.

### NO MANAGER

Some members believe that the 11-man board of directors should administer the association and the fair without a hired manager.

Other controversies of the moment involve the condition of the aging fair buildings and the use of fair grounds by a Central Saanich centennial project.

A decision was reached at the meeting to make the fair grounds available to the project. But some sources say a question remains as to who will maintain the museum.

# Clear Course On School Vote Asked by Bunn

## Referendum Chances Hurt By Simultaneous Bylaws

Greater Victoria School Board chairman Peter Bunn wants a clear field when a multi-million-dollar referendum goes to the people in April.

A definite date for the referendum seeking approval for expenditures in excess of \$10 million, will be established at a special meeting of the school board tonight.

"I would hope that we can hold the referendum separately from other municipal referendums," said Mr. Bunn this morning. "That is purely a personal observation, but I intend to ask the board tonight to set a date which will keep the school vote well clear of other matters."

### PARKS VOTE

Esquimalt has announced that it will probably go to the people with a parks referendum and possibly with a separate fire-fighting service referendum at the same time as the school board money vote.

"We have found in the past that school referendums can be hurt by other votes taken on the same day," Mr. Bunn said. "I can't speak for the rest of the school board, but I have every hope that they will agree to hold our vote entirely separate."

If approved the multi-million dollar referendum will enable the school board to raise funds for site acquisition, school construction and equipment.

### GAS PRICE PROBE

March 10 Deadline On Briefs

A special legislative committee studying gasoline prices today set March 10 as the deadline for receiving submissions from interested parties.

The committee, which will update the Morrow Royal Commission report on gasoline prices handed in last session, elected Herb Capozzi (SC-Vancouver Centre) as its chairman.

### SHELFIELD DECLINES

Cyril Sheldford (SC-Omineca) the man who sparked establishment of both the royal commission and the committee, declined to serve as chairman because he said he plans to have a lot to say and did not want to be inhibited by the duties of a chairman.

The committee will hold its first working session next Tuesday at 10 a.m. as it begins its survey of how far the recommendations of Judge Charles Morrow have been implemented and whether legislation is needed at this session.

His recommendations included divorcing retail service stations from oil company control, lowering gas prices and a five-year moratorium on new service station construction.

Among goods missing is a \$300 color TV set and two \$550 smaller color models.

City detectives said a rear window in the TV repair business had been smashed.

A stock inventory was still underway at noon but other items reported missing included two tape recorders.

### 3 TV Sets In Big Haul

About \$3,500 worth of electronic equipment was reported stolen overnight in a break-in at Tele-Tech Services Ltd., 1202 West Street.

City detectives said a rear window in the TV repair business had been smashed.

A stock inventory was still underway at noon but other items reported missing included two tape recorders.

### Ask The Times

Q. In the provincial legislature recently Waldo Skillings referred to Dr. John B. MacDonald, president of UBC as a "lame duck." How come?—W.T.

A. Referring to our legislative reporter's notes after Mr. Skillings admitted on questioning by Alex Macdonald (NDP—Vancouver East) that he was talking about President Macdonald, Pat McGeer (Lib.—Vancouver-Burrard) asked "How is he a lame duck?"

"Because," answered Mr. Skillings, "he loses his office June 30."

The term "lame duck" was first applied to a

# Delay in School Tied to Cabinet

Saanich Rejects Criticism From Social Credit Official

By ROGER STONEBANKS

The blame for the delay in a vocational school in this area belongs with the government and not with Saanich, the municipal council agreed Monday night.

"I resent the suggestion that Saanich is the villain of the piece," Reeve Hugh Curtis told Ross Regan, second vice-president of the Esquimalt Social Credit Constituency Association.

"Your concern is commendable but I think you're in the wrong building."

A vocational school has been planned for several years at Burnside and Trans-Canada Highway. Saanich has provided six acres but 25 acres are needed.

**Neighboring property is owned by B.C. Hydro and privately.**

A letter from the Social Credit group said Saanich has accepted responsibility for finding the land and asked how it proposed to solve the problem.

"It's the provincial government who will assemble the

## Commitment Ends With Land

Reeve Curtis said there has never been a suggestion of commitment by Saanich except responding to a provincial request to turn over six acres to the province.

"Hydro is not willing to pay the going price. It is not a municipal responsibility to pay it just because a crown agency won't."

"The property that is needed is B.C. Hydro. If they can't resolve it I don't see why Saanich should resolve it."

"If a higher priority were placed on a vocational school, it would be under construction today."

Municipal planner Tom Loney

## IN CENTRAL COURT

### Tax Deadline Missed; Employer Fined \$200

An employer who neglected to forward his staff's income tax deductions to the government before the deadline was fined \$200 in central court Monday.

John McBride Moore, operator of Moore Printing Co. at 565 Johnson, pleaded guilty to the offence under the Income Tax Act.

He told the court he was unaware the \$31.01 in withheld taxes had not been forwarded by last Nov. 15 as he was not handling the company's books.

The \$200 fine represents the minimum under the act.

★ ★ ★

A woman who shoplifted children's clothing while accompanied by her five-year-old son was fined \$75.

Mrs. Kathleen Tenhave, 2951 Craigowan, pleaded not guilty.

## TWO SHIRTS

The accused put two child's shirts, a raincoat and a summer playsuit in a shopping bag and then paid only for a hat at the Bay Jan. 30, court was told. She was stopped by store detectives before she left the store.

The stolen clothing was worth \$10.78 and Mrs. Tenhave had over \$7 in her purse when arrested.

## Up-Island Man Suffered Attack Before Collision

A heart attack suffered by a Cobble Hill man was responsible for a two-car crash on the Trans-Canada Highway Sunday morning. Coroner Edmond St. Jorre ruled Monday.

Albert Ernest Harrison, 62, was dead on arrival at hospital following the almost head-on collision at Grange Road.

The coroner said a pathologist's report showed the dead man suffered a seizure. No one was to blame in the accident, he ruled.

Mr. Harrison's wife, Susan, 55, is in good condition at St. Joseph's Hospital from injuries she suffered in the crash.

The driver of the other car, Gordon Hett of 3084 Jacklin, and his two passengers received only minor injuries.

## Marriage No Good If Questioned — History's No Good If Revised

Applying some interesting if extravagant figures of speech to the Social Credit government, Gordon Dowding (NDP-Burnaby-Edmonds) said Monday it is both a bad historian and a bad marriage partner.

Referring to separatism-flavored statements by cabinet members, Mr. Dowding said they were "an inherent danger to the unity of the Canadian marriage."

"After all," he said, "what marriage could survive where one spouse shouts he could get

## Bastion Grant Request Sticky Wicket

Oak Bay council split down the middle at a meeting Monday over a grant-in-aid to Bastion Theatre.

Commenting on a letter from director Peter Mannerling, who said 40 per cent of the season ticket holders are from Oak Bay, Coun. J. D. Watts said: "Oak Bay derives a benefit out of all proportion to the inter-municipal financing formula."

"This grant is a little different," he said.

Coun. J. W. Wade said it would create a precedent if the theatre got special consideration. "What about the other theatrical groups — and the music school?" he asked.

"This is nothing new," said Coun. Fred Hawes. "It's definitely an inter-municipal problem."

## SPECIAL CASE

Coun. Frances Elford, who said the theatre presented a special case, suggested the matter be referred to the Community Welfare council.

Reeve Cox said the matter should be studied by the Inter-municipal Committee and the council's own estimates committee "so it doesn't get sidetracked."

## COUNCIL AGREED

"Mr. Mannerling, who said the Oak Bay use of both theatre and theatre school facilities rivalled that of the city itself, had asked for a grant of \$2,000.

In other business council:

• Referred to estimates committee a 1967 Oak Bay police budget of \$193,844.

• Re-appointed J. Mace, G. Taylor and R. Freethy to the Oak Bay Recreation Commission and recognized E. Costain, Mrs. K. Costain, Mr. Symon and Mrs. I. Craig for 10 years service to the commission;

• Adopted an Inter-municipal Committee cost-sharing arrangement for the coming fiscal year whereby the municipality's share, on a variable plan, ranges from 12.85 to 12.54 per cent;

• Approved a Greater Victoria Inter-municipal Committee grant of their share of \$1,000 for a playground supervisors workshop.

## HIGH SCHOOL 'BRIGHTENED' BY MOB GARB

PRINCE RUPERT, B.C. (CP) — Clothing styles from London's Carnaby Street drove the entire high school population in this northern coastal city mad Monday, and the principal went with them.

"Birds" in mini-skirts or bell-bottoms mingled with boys dressed in low-slung chequered pants and flowered shirts, while principal Bill O'Brien sported a bright Paisley tie fastened with the double-double Windsor knot favored by the "in" crowd.

"We did it for a change," said Mr. O'Brien. "It certainly brightened up a dull winter's day."

The mini-skirts created no problem. Mr. O'Brien said to anyone, "It's a good behavior bond."

Joe Matejcie, 30, had been held in jail for sentence since pleading guilty Saturday.

Magistrate Ostler refused prosecutor Peter Birken's request that sentencing be delayed because other charges were pending.

★ ★ ★

## FINED FOR DOG

James Pace, 897 Swan, was fined \$5 when he pleaded guilty to letting his dog run at large.

Pound keeper Albert Oost told the court he had chased the accused's dog for a block before it ran home.

Pace told the court two weeks ago that his dog left its property to chase the dog catcher.

★ ★ ★

## STANLEY RIFE

OTTAWA (CP) — A report on the feasibility of setting up a Canadian council for animal care is expected in about three weeks. Prime Minister Pearson told the Commons Monday.

Barry Mather (NDP-New Westminster) had asked whether the question of animal welfare could be referred to a parliamentary committee.

★ ★ ★

## BROTHERHOOD WILL BE RETROACTIVE

It has been Brotherhood Week in Victoria since last Sunday but city council won't get around to making it official until Thursday.

The official resolution will be passed at the regular council meeting Thursday afternoon declaring Feb. 19-26 Brotherhood Week.

The week, sponsored by the Canadian Council of Christians and Jews, is designed to give citizens an opportunity to rededicate themselves as individuals to the basic ideals of respect for people and human rights.

## POSSESSION

Lawrence Fiddick, 539 Judith, was fined \$35 when he pleaded guilty to being a minor in possession of liquor.

Police spotted him hiding a bottle of beer in the grass in Mount Douglas Park last May 28.

## ANIMAL BYLAW UNDER SCRUTINY

# Do Dogs Have Right to Stroll in Parks?

Heavier punishments and stronger enforcement of the present animals bylaw in Saanich were suggested Monday night.

At a council meeting, Coun. Edward Lum said the bylaw is sufficient "if we had the men to enforce it."

Two ratepayers told council the owners of roaming dogs should have to pay double the fine each time and that licence fees should be low, but those who don't have licences should be heavily fined.

A draft new animals bylaw continues existing regulations on dogs at large, but introduces restrictions on the numbers of pets that could be kept in a home.

It is stressed, however, that the draft is only that. Council is seeking written public comments before considering the proposal.

Council agreed that because of the interest in the subject, copies of the draft should be made available at the Municipal Hall, at a price to be set by comptroller John Tribe which would cover stationery costs.

"We'll be getting lots of requests since the

Times came out with it," said Coun. Lum. "I've had calls."

Added Reeve Hugh Curtis: "I think I've had calls from talking dogs."

Municipal planner Tom Loney said it is felt that after replies are received, a new draft will be prepared for the lands and planning committee to study.

Coun. Leslie Passmore made the verbal suggestion that no dogs should be allowed in public parks and beaches because they foul the ground children are playing on.

(Both the existing and draft bylaws allow dogs in these areas but only on a leash or chain.)

Coun. William Noel disagreed, and Reeve Curtis thought this restriction is "close to infringing on civil rights."

One ratepayer, who said he has exhibited dogs across the continent, said motels prefer dogs to children "because they don't steal towels."

Coun. Passmore stuck to his no-parks argument. "Dogs excrete and I don't like it. It is not sanitary, not hygienic and not desirable."

CURTIS  
who's barking?

## Loan Cut Back To \$950,000

Saanich council agreed to a proposal Monday night which would lower the amount needed to borrow for the recreation referendum next month.

Comptroller-treasurer J. O. H. Tribe suggested the \$1.2 million necessary could be raised by a one-mill levy this year and a one-mill levy next year, and the remainder borrowed.

This would provide \$38,000 this year and \$102,000 next year. To this would be added \$100,000 appropriation from tax sale funds, leaving \$950,000 to be borrowed.

Mr. Tribe said it would not be necessary to borrow until next year so there would be no debt repayment until 1969.

"This is designed to smooth things out," he said, noting that in coming years Saanich will be borrowing for the capital projects budget approved in the 1965 municipal elections. So far there has been no borrowing for this program.

However, it is suggested that the bylaw contain a recital to the effect that it is desirable to place one mill in this year's budget and a recital to the effect that it is anticipated that one mill will be provided next year.

If the electors approve of the bylaw, then we can assume that they have also approved of the one-mill levies for this year and next year and therefore next year's council would undoubtedly provide this sum in its budget."

## GOOD SENSE

Reeve Hugh Curtis said "it makes good sense" if "we can reduce the amount needed to borrow, all to the good."

Mr. Tribe said it would not be necessary to borrow until next year so there would be no debt repayment until 1969.

"This is designed to smooth things out," he said, noting that in coming years Saanich will be borrowing for the capital projects budget approved in the 1965 municipal elections. So far there has been no borrowing for this program.

He explained that one mill is equal to about two per cent in taxes—a person with a tax bill of \$400, which is high, would pay an extra \$8.

## NORAD on Watch For Space Invasion

by Canada and the U.S.

The officers spoke to the Canadian Officers School Venues at 11 a.m. today and will speak again at Royal Roads at 7 p.m.

"Birds" in mini-skirts or bell-bottoms mingled with boys dressed in low-slung chequered pants and flowered shirts, while principal Bill O'Brien sported a bright Paisley tie fastened with the double-double Windsor knot favored by the "in" crowd.

He explained that one mill is equal to about two per cent in taxes—a person with a tax bill of \$400, which is high, would pay an extra \$8.

Overhead wires on a mile-long stretch of Gorge Waterway should be underground by end of next month, B.C. Hydro said today.

The program is the second phase of Gorge beautification. The Capital Improvement District Commission has provided \$105,000 for the work. First phase was improving the shoreline with a retaining wall.

The second phase is to put electricity, telephone, cable television and street lighting cables underground. Saanich work crews began trenching last week.

Electricity cables alone stretch 4,600 feet along this part of the Gorge.

Work will await provincial government approval.

Other improvements to this area include cleaning up Gorge Park, now owned by Saanich, a new Gorge Bridge and widening of the intersection at Gorge and Tillicum.

Fire Chief Albert Beasley reported the volunteer department attended 28 fires last year.

## GLIDER TEST JOINS LIST OF EVENTS

A glider contest, with sailplanes competing over a 40-mile course has been announced as a B.C. centennial project.

Centennial general chairman L. J. Wallace said the flight path extends from Langley, B.C., to Pincher Creek, Alta.

Canadian pilots in Canadian registered planes will compete for \$1,000 offered by Skyway Air Services of Abbotsford. Flight will be made between April 1, 1967, and April 1, 1968.

Skyway owner Art Seller, Box 220, Abbotsford, will supply further information.

## Wires Down By End Of March

Overhead wires on a mile-long stretch of Gorge Waterway should be underground by end of next month, B.C. Hydro said today.

The program is the second

phase of Gorge beautification. The Capital Improvement District Commission has provided \$105,000 for the work. First

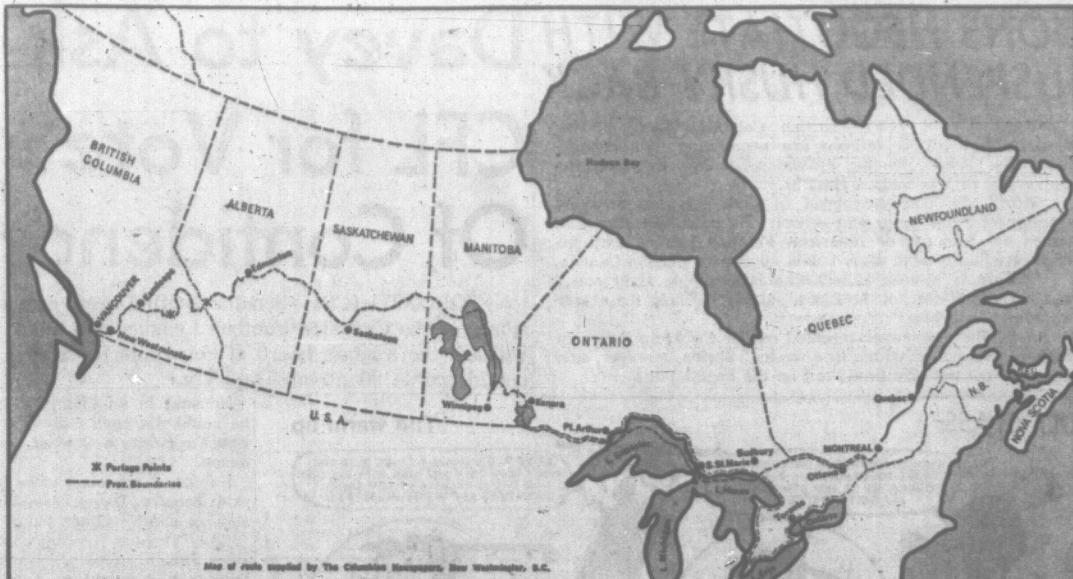

phase was improving the shore-

line with a retaining wall.

The second phase is to put

electricity, telephone, cable

television and street lighting cables

Line shows route of canoe trip across Canada. At stars is where they must get out and walk.

## BY CANOE IN CENTENNIAL SAGA

## Getting to Expo the Hard Way

**NEW WESTMINSTER** — The spirit of adventure is still very much alive in Canada and four Royal City men are out to prove it.

The group is planning a 6,000-mile journey to Montreal starting April 1, by canoe, retracing the exact route along the trans-Canada waterway Simon Fraser took in 1808.

All other Centennial canoe sagas pale by comparison. The federal government-sponsored journey by 10 canoe teams will leave Alberta later this year and travel some of the distance by truck.

## LIGHTS! CAMERA! SCREEEECH CRASH!! THE END

By DON VIFOND — If seeing is believing, a potent new safety program by Saanich police may cut the bloody toll on the highways.

The heart of the program is a film—Mechanized Death.

But there are no actors.

The film takes you along with the Ohio State Police as they handle accident cases.

Here is a state trooper bursting into tears as he lifts the smashed body of a baby from a wrecked car.

And there is the body of a young man, his head literally welded to the door frame.

The red in the film is blood—honest-to-God sticky human blood.

And the screams are from people who are really cut, smashed, broken and in some cases dying.

A film for sadists, for ghouls? Not at all, says Constable Bill Chisholm. It's a film for anybody who drives because it portrays precisely what will happen to you in a bad accident.

## IN BUILDING

"People just don't realize what an accident is," he says. "It's better they find out in the safety of a building than out on the highway."

"We're not after making your stomach squirm," says Chief W. A. Pearson. "We want to show people exactly what that word accident is all about."

The film shows not only the grisly results but reconstructs how these accidents happened.

The safety program, which includes the film, brief talks and some displays, has been shown at Saanich high schools and so far no teacher or student has complained about its realism.

In fact a number of students have said they'd like their parents to see it.

So this Saturday police are

## Burglar Walks Plank

A thief walked up a plank placed beside the bedroom window of a Saanich home in a break-in reported Sunday.

Trevor Cole, 1650 Teakwood, told officers \$110 was missing from a wallet left in a jacket.

## HOME GARDEN

## Blue Popular Color To Mix With Yellow

By HILDA BEASTALL — The color blue is eagerly sought by many gardeners as being highly desirable in their plants.

There is no doubt of its suitability as a companion for the yellows and gold of spring, to accompany the soft pink and yellow of summer, and again in the early fall to set off the yellow and gold.

In each of these three seasons we Hilda may find a number of blue-flowered plants of easy culture once their few needs are known.

Among the reticulata group of bulbous iris are some of the best blues of the garden. These are the dwarf irises which we may consider as late winter and earliest spring flowers.

MacNaughton, 39; Dr. David Chisholm, a 28-year-old Royal City physician and surgeon; and Jim Reid, a 22-year-old student.

Accompanying the quartet, in a supply truck paralleling the route wherever possible, will be Edo and Lorna Hemmes. Mr. Hemmes is a life insurance underwriter who emigrated to Canada 15 years ago with his wife.

Brine said Canada's Confederation inspired the trip. "But I have always wanted to try something that hasn't been done before," he said.

Dr. Chisholm, who also skis, pilots his own aircraft and is an avid scuba diver, says

simply: "I have a thirst for adventure."

Long canoe trips are old hat for Reid, at 22 the youngest of the voyageurs. Last year he travelled 3,000 miles through the waterways of northern B.C. and Northwest Territories. Reid will return to university in the fall.

The Eastward Ho! adventure, as Brine has named it, is scheduled to arrive in Montreal July 15, British Columbia Day at Expo.

MacNaughton's employer, B.C. Telephone, is providing a radiotelephone, a vital link in case of emergency and also to report to newspapers and radio stations.

## AUDITOR-GENERAL COMPLAINS

## Money-Saving Tips Ignored

OTTAWA (CP) — Canada's auditor-general, the man who keeps track of bureaucracy's boners, announced his annual findings Monday.

Maxwell Henderson found 463 personnel at Feb. 1, 1966, in line to be paid both for getting out of the armed services and for coming back in.

He found more than half the recommendations of the 1961-62 royal commission on government organization still to be implemented.

He encountered lease-breakdown problems and sour construction contracts on all sides.

And with the long memory proper to his office, the auditor-general reminded the federal government time and again about things found amiss in his earlier reports and still in need of correction.

Mr. Henderson's report for 1965-66, tabled Monday in the Commons, is the result of a year's examination of government departments for instances of doubtful judgment.

## HITS PAYMENTS

Mr. Henderson critized payments by the defence department of both \$200 re-engagement bonuses and special early-release allowances to some personnel.

Not only was it illogical, said the report, but the bonuses for agreeing to remain in the forces "did not stem the loss of skilled personnel to the extent expected."

During the two years from May, 1964 to May, 1965, 3,322 members of the armed forces received special benefits at a cost of \$9,800,000 for early retirement from the forces. The plan was introduced initially to

cut 10,000 from the strength of the regular forces.

With civilian demand high in 1965-66 for technicians and specialists, 64,000 personnel were paid re-engagement bonuses, totalling \$22,728,000.

The overlap of the programs a year ago resulted in the 463 persons receiving or being eligible for both incentives.

He also cited a case of 14 members of the army, returning from Cyprus to Canada, who were flown by service aircraft to Esquimalt, B.C., where they picked up their automobiles and then claimed travel expenses to return to eastern Canada. Their plane had stopped at Trenton, Ont., where they could have deplaned at a saving of \$4,600 to the treasury. Mr. Henderson said:

Long-term leases also caused headaches, especially to the defence department, which had to break several when it decided to close out many reserve units. One settlement in Toronto cost \$175,313.

The auditor-general let the cat out of the bag on government thinking about postal rates, giving the first firm indication that second-class rates will be raised this year. Losses in handling newspaper and periodical mailings resulted in \$28,100,000 of the postal department's overall \$34,500,000 deficit last year.

Mr. Henderson said he still is waiting to see action on his recommendations for a better appropriation.

Pension Act and for tightened procedures in granting war veterans' allowances. He said the government is getting fraudulent claims from veterans, but it is not making a single prosecution.

He turned up cases of government annuity cheques going out to people now dead.

The federal government was, in effect, making grants to both Expo 67 and the CBC for their building programs. The grants were being called loans, even though Expo could never repay them and the CBC could do so only by special parliamentary appropriation.

## Announce New Healing Substance... Shrinks Piles, Checks Itch

Exclusive healing substance proven to shrink hemorrhoids...and repair damaged tissue.

many months.

This was accomplished with a new healing substance (Bio-Dyne) which quickly helps heal injured cells and stimulates growth of new tissue. Bio-Dyne is offered in ointment and suppository form called Preparation H.

One hemorrhoid case history

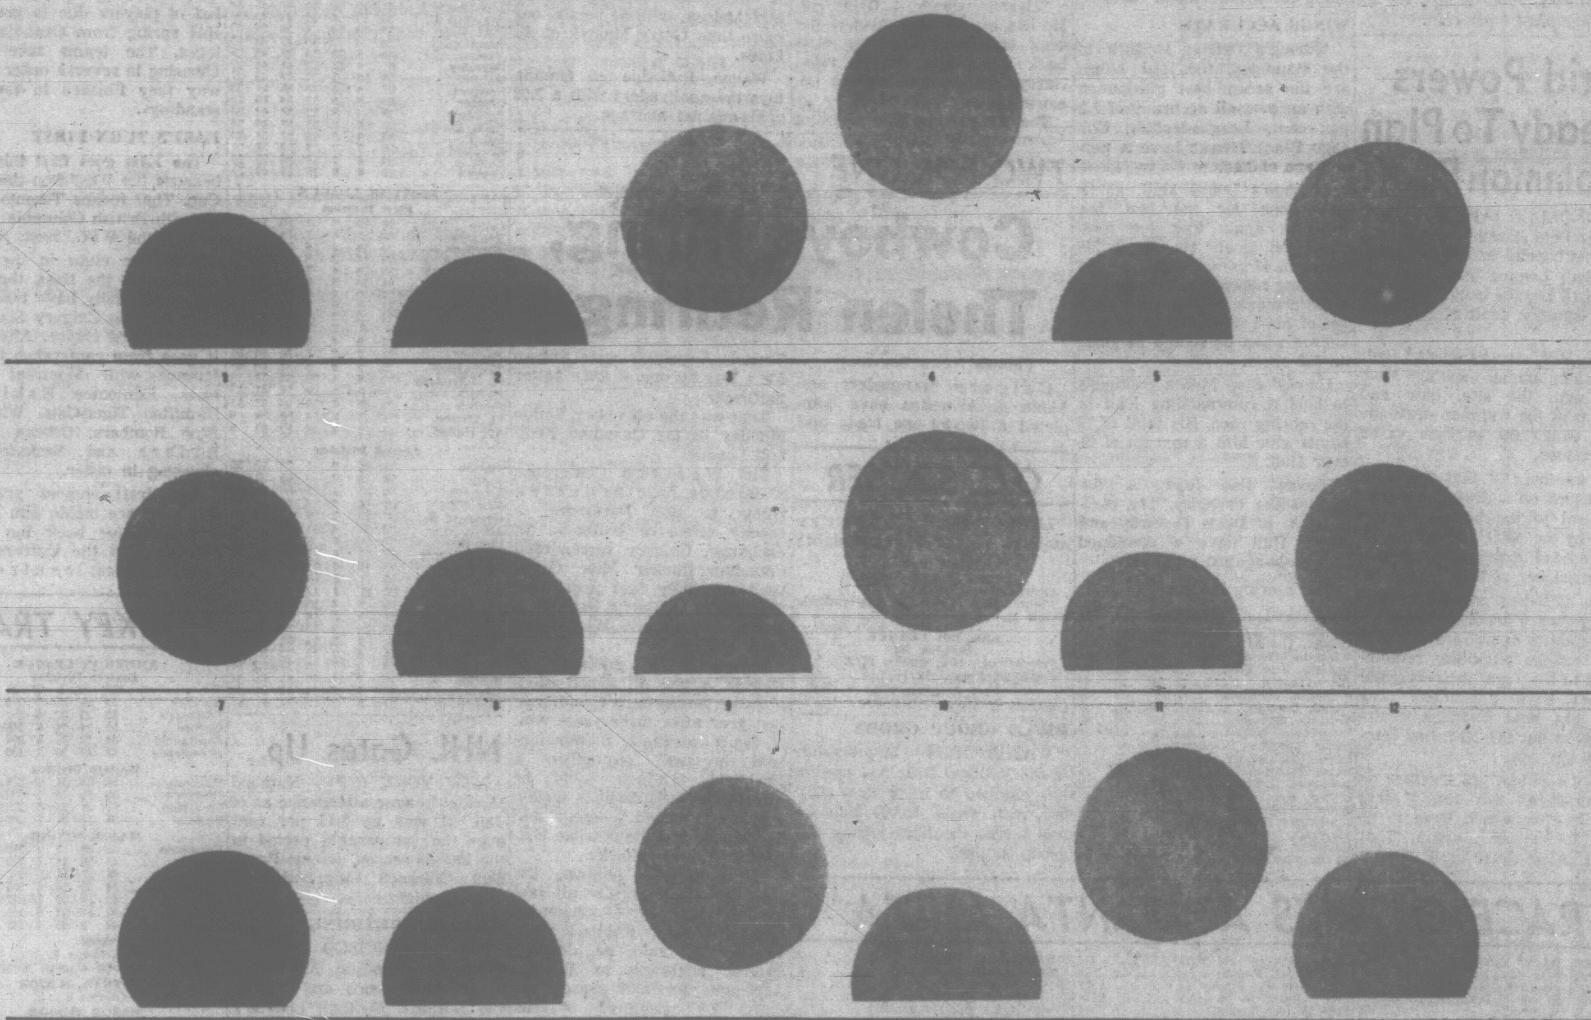

after another reported "very striking improvement." Pain was promptly and gently relieved... actual reduction or retraction (shrinking) took place.

Among these case histories were a variety of hemorrhoidal conditions. Relief even occurred in cases of long standing, and most important of all, results were so thorough that this improvement was maintained over a period of

MACFARLANE

## Separatism Boiling Up Into Fracas

By JOHN MIKA  
Legislative Reporter

The burgeoning debate over the provincial cabinet's attitude towards Confederation is expected to grow more heated today with the soft-spoken echo of the word "treasonable" still in the air.

The controversy, rapidly escalating into a dominant argument of the session, was intensified Monday as Alan Macfarlane (L—Oak Bay) demanded the government stop its kite-flying and reveal its "reasons for throwing up this incredible smokescreen of separation."

Then he touched off a brief outburst while winding up the budget debate for the Liberal party.

"To treat the threats seriously would be to accept the fact that this government is guilty of treasonable motives, a lack of patriotism, and of a desire to divide Canada and fracture Confederation," he said.

A chorus of "absolute nonsense" and "ridiculous" burst from the Sacred benches.

### Daily Doses

"I agree it's nonsense," he shouted back, "but it has been spoken by your premier and by your cabinet and we've been getting this absolute nonsense every day."

Premier Bennett's spending estimates—including his salary vote which is the traditional juncture of opposition members to zero in on his policies—is slated to come up at today's sitting.

There were suggestions Monday night that the demand for a government statement on reasons for it will be continued by the opposition.

### 'Very Shallow'

Snapping back at laughter greeting his speech, Mr. Macfarlane said. Sacred backbenchers were "very shallow if they don't think this subject is serious."

"Are these fellows," he said pointing at the backbenchers, "going to ride out of Confederation on the coattails of the premier as they rode into office?"

### John Tisdale (SC—Saanich-The Islands) interjected "we'll ride a Liberal jackson."

"I'll pay no attention to the bray from Saanich and The Islands."

Mr. Macfarlane said he preferred to believe that the government's motives were political bluffing to divert attention from its own failings.

### 'Playing Politics'

"Because I have to have some faith in the sanity of this government, I find it difficult to avoid the irresistible conclusion that this government is playing politics when it should be promoting patriotism," he said.

"It is that this government is so totally committed to the cost of the two power projects that they have to find a whipping boy to blame for the lack of

### ARRESTED IN NEW ORLEANS IN 1963

## Oswald Aide Caught, Freed

WASHINGTON (UPI)—Sen. Russell B. Long (D-La.) said today the New Orleans district attorney "has something" that Warren Commission investigators failed to uncover about the assassination of President Kennedy.

District Attorney Jim Garrison has promised he will arrest persons connected with Lee Harvey Oswald in an alleged conspiracy to kill Kennedy.

Long told newsmen that Garrison has kept him informed about the general situation of the New Orleans investigation.

"I think he has something that the Kennedy report does not have," Long said.

Long said that Garrison had arrested a person he thought to be involved in an assassination plot shortly after Kennedy was killed in Dallas Nov. 22, 1963.

"But when the press media

## FINAL BULLETINS

### Court Asks Further Submissions

VANCOUVER (CP)—The British Columbia Appeal Court has asked for further submissions from lawyers in the appeal of René Castellani, convicted late last year of capital murder, it was reported today.

Castellani, 41, is under sentence to be hanged March 28 for the arsenic slaying of his wife Esther, 40, who died July 11, 1965.

Judges recently reserved decision on Castellani's appeal.

### Imlach's Heart Pronounced Okay

(See earlier story Page 10)

TORONTO (CP)—Manager-coach Punch Imlach, of Toronto Maple Leafs, got a clean bill of health today as far as his heart goes and got out of hospital by weekend.

Dr. R. N. Green said results of electrocardiogram tests showed no evidence of heart damage and Imlach has bounced back faster than expected.

### U.S. Attack Alleged By Chinese

TOKYO (UPI)—Radio Peking charged today that 22 United States aircraft strafed and destroyed two Chinese fishing boats in the Gulf of Tonkin, off Hainan Island, Monday, killing one fisherman and wounding two others.

The broadcast monitored here said 31 other United States planes violated Chinese airspace today.

### Clay Seeks Frazier Bout In Tokyo

CHICAGO (AP)—Herbert Muhammad, manager of Cassius Clay, left Chicago for Tokyo today and will negotiate for a May 27 title fight there between the heavyweight champion and Joe Frazier, of Philadelphia.

Clay, who is in Houston for two weeks before going to New York, will defend his title against Zora Folley, March 22, in Madison Square Garden.

## CIA Support To Be Curtailed

(See Also Page 2)

WASHINGTON (UPI)—The director of the Central Intelligence Agency told a Senate watch-dog committee today that the spy agency will withdraw its financial support from a number of non-government organizations.

Richard Helms met with the 12-member subcommittee behind closed doors. The substance of his testimony was disclosed by Chairman Richard B. Russell, (D-Ga.) who strongly defended the CIA in talks with newsmen.

Russell said the furor caused by CIA's involvement with the national student association and other non-government groups has "greatly damaged its effectiveness." Russell described as "just a lot of hogwash" the idea

that the CIA involvement has damaged academic freedom.

Russell first gave as his own opinion that, in view of the recent publicity, "it might be well for the CIA to sever financial connections with a great number of organizations."

Asked whether Helms has stated that CIA support would be withdrawn, Russell first said, "yes" but then said he would rather not quote Helms.

"In my opinion, support for some of these agencies will be withdrawn, because it would be a waste to continue," Russell said.

The chairman declined to say what specific financial grants would be curtailed, saying: "I prefer not to go into a detailed list of all of the organizations that are involved."

### Hit-Run Passenger Forced to View Body

NANAIMO (CP)—A passenger from a car that left the scene of a fatal accident was forced to view the victim's body Monday night.

"Your conscience is going to haunt you the rest of your living days," Coroner Russ Inkster told James Crighton, 36, at the inquest into the death of Jeannie Tinkham, 16. (See Page 6.)

The girl was killed while walking home from a movie Saturday night.

**DRIVER IN CUSTODY**

Frank Suderman, of Gold River, 21-year-old driver of the car, pleaded guilty in magistrate's court Monday to a charge of dangerous driving and failing to remain at the scene of an accident. He is being held in custody pending sentencing March 6.

"There was a reason for not bringing him (Suderman) down here tonight," the coroner said. "I was told he was so

driving he couldn't be brought down."

Just before Crighton, held in jail on a coroner's warrant, was taken to view the victim's body Monday night.

In a speech to the 17-nation Disarmament Conference which resumed here, Soviet delegate Alexei A. Roschin said: "Attempts are being made to question the necessity of solving this problem, to hamper the achievement of an agreement."

He said statements were being made that "a treaty on non-proliferation would hinder the peaceful use of scientific discoveries in the sphere of nuclear energy by states not possessing nuclear weapons."

He said statements against conclusion of a treaty were made in countries including West Germany by politicians and in the press.

Meanwhile, U.S. President Johnson told the disarmament negotiations that failure to halt the spread of nuclear arms could mean that even local conflicts will involve the danger of nuclear war.

In a message to the committee, he said he hopes it will soon get a draft of a proposed timetable.

Garrison told newsmen Monday that he still believes the Warren Commission was wrong in its conclusion that Oswald alone killed Kennedy in Dallas. He predicted his investigation would lead to arrests and convictions.

Long said Garrison had asked him not to tell the FBI about information he had uncovered. Long said he hadn't told the FBI.

As to whether Garrison's information may prove valuable, Long would only say that the district attorney had a distinguished career in New Orleans and had shown a strong intellectual curiosity.

In New Orleans, Garrison said arrests in the Kennedy assassination he once said were "imminent" are now months off. He blamed premature disclosure of his investigation for upsetting the timetable.

Garrison told newsmen Monday that he still believes the Warren Commission was wrong in its conclusion that Oswald alone killed Kennedy in Dallas. He predicted his investigation would lead to arrests and convictions.

## Reds Strong In India Vote

NEW DELHI (CP) — Early returns in India's general elections today showed an unexpectedly strong showing by the right-wing Hindu Jan Sangh party in the nation's capital. A power sweep in the southern state of Kerala by Communists and leftist allies appeared a certainty.

In one of two prestige races for seats in Parliament from New Delhi, Mahr Chang Khanna, works and housing minister, was more than 9,000 votes behind M. L. Sondhi, the Jan Sangh candidate who quit India's foreign service and ruling Congress party to campaign on a Jan Sangh ticket.

The national president of Jan Sangh, Balraj Madhok, had a similar lead over Congress party MP Raghavendra Singh in the other prestige contest.

This Jan Sangh showing in New Delhi, which last November was the scene of bloody rioting over the slaughter of India's cows, considered sacred by Hindus, bears out indications of broad Hindu religious revival particularly across the country's northern belt. In the November rioting, Hindus were demonstrating for a national ban on killing cows.

A festive but tense atmosphere prevailed and police were out in strength to prevent violence. The total vote was estimated at 150,000 ballots.

**MENON IN SPOTLIGHT**

The spotlight in today's final round of polling in nine states and two territories was on the teeming northeast constituency of Bombay, where former defence minister V. K. Krishna Menon was running for Parliament as an independent candidate.

Menon won landslide victories in 1957 and 1962 when he had the support of the ruling Congress party and the late Prime Minister Nehru.

This year, however, the local party committed turned down his bid to stand for re-election from Bombay, nominating instead S. G. Barve, retired civil servant. Menon resigned from the party in protest.

## Bobby Defends CIA: Just Taking Orders'

WASHINGTON (UPI) — Sen. Robert Kennedy, whose familiarity with the spy agency problem goes back to the Bay of Pigs fiasco, said today it was unfair to make the CIA "take the rap" for secretly subsidizing private organizations.

The former attorney-general voiced his sympathy for the CIA, buffeted in a wave of protest reaction to the disclosure that it had channeled money through various foundations to student and other organizations with international activities.

These basic decisions were not made unilaterally by the CIA but by the executive branch in the Eisenhower, Kennedy and Johnson administrations,

**GERMANS**

Continued from Page 1  
West Germans have been most outspoken in charging that present proposals for a treaty might hurt their nuclear industry.

The 17 nations participating in the conference hope to have the treaty ready by the last week in September when the UN General Assembly convenes in New York.

The three nuclear powers at the five-year-old conference — the United States, Russia and Britain — are almost fully agreed on the terms of the treaty to prevent the further spread of nuclear weapons, British Disarmament Minister Lord Chalfont told reporter Monday.

The West is represented by Canada and in addition to Britain and the U.S. On the Eastern side, in addition to Russia, are Poland, Romania, Czechoslovakia and Bulgaria. The neutral countries are India, Burma, Ethiopia, Sweden, Nigeria, United Arab Republic, Mexico and Brazil.

Lt.-Gen. E. L. M. Burns is Canada's delegation leader.

**Minor Aid**

CHICAGO (UPI) — The National Council of Churches (NCC) said today that its programs had received "minor" financial assistance from foundations now under investigation for alleged links with the Central Intelligence Agency.

## WEATHER SYNOPSIS

The cold air which moved into the Cariboo this morning will spread through the interior to the Kootenay area today. However, it is expected to stall in the western interior and the South Thompson and Okanagan Valleys will remain in the milder air. The cold air is dry and there is little cloud associated with it.

A ridge of high pressure lies over other areas of B.C. and skies were mostly sunny today. There is a weather disturbance near the weather ship this morning though, and this will bring extensive cloudiness and a few showers to B.C. on Wednesday.

**DOMINION PUBLIC WEATHER OFFICE 9 A.M. FORECASTS**

Valid Until: Midnight Wednesday Victoria: Cloudy Wednesday with a few showers in the afternoon. Little change in temperature. Winds light increasing to easterly 15 Wednesday morning and becoming westerly 25 and gusty in the evening. Low tonight and high Wednesday, 38 and 47.

Vancouver - Georgia Strait: Cloudy Wednesday with a few showers in the afternoon. Little change in temperature. Winds light increasing to southeast 20 in the evening. Low tonight and high Wednesday at Vancouver, 32 and 45; Nanaimo, 28 and 47.

## ... SEPARATISM

Continued from Page 1

real action in education, health and welfare and is that whipping boy Canada?

"If that's the situation, then this government ought to resign."

Mr. Macfarlane said he was disturbed by Recreation and Conservation Minister Kenneth Kiernan's first pronouncements at this session on B.C. being better off economically if it quit Confederation, but he was alarmed at the second speech's anger towards the Quebec and the French language.

### Racial Prejudice'

"I was alarmed because in that speech I heard what I had hoped I would never hear from a responsible cabinet minister — a speech which fanned the flames of racial prejudice in this country."

"How low can you sink, in this Confederation year trying to divide the nation along lines of race and language?"

He ticked off Trade and Industry Minister Ralph Loffmark and Municipal Affairs Dan Campbell for other secession "threats" and said B.C. is not a sovereign state and Mr. Bennett "is not a king and I hope the minister of municipal affairs is not suggesting that he should be."

### Crying Separatism'

"Anybody who claims that we should be a sovereign state is crying separation and nothing else."

"The alarming thing is that the premier of this province has never repudiated the separatist outbursts of his colleagues, but he has done so."

Mr. Macfarlane said he was even more alarmed when he read the Peter Newman article on Premier Bennett in The Times Saturday "because it appeared that the premier was serious in saying we could go it alone and he would do so."

Mr. Macfarlane said it might be that the anti-Confederation talk was intended to cover up Premier Bennett's "weak case for better federal treatment but this argument should be pressed with honor rather than resorting to subterfuge, to threats and intimidation."

### Heard Howl Before

He recalled that Feb. 27, 1961, the two New Orleans papers from the Monday news conference, which he moved from his office to a hotel so that the barred newsmen could not claim they had been banned from public property. Forty other local and out-of-town reporters attended.

Garrison said the two local newspapers hurt his investigation by putting one of his witnesses in jeopardy and making it difficult to find another.

"I think it is unfair that the CIA should take the rap on this. Any of these decisions made by CIA had to have been approved by others."

### OSWALD

Continued from Page 1  
the two New Orleans papers from the Monday news conference, which he moved from his office to a hotel so that the barred newsmen could not claim they had been banned from public property. Forty other local and out-of-town reporters attended.

Garrison said the two local newspapers hurt his investigation by putting one of his witnesses in jeopardy and making it difficult to find another.

"I think it is unfair that the CIA should take the rap on this. Any of these decisions made by CIA had to have been approved by others."

He said none of the suspects was an official of the United States government or an agent of a foreign government.

Garrison told the conference he would not meet the press again until he has a solid break to announce.

Mr. Loffmark, in his speech, quoted a saying that "patriotism is the last refuge of a scoundrel."

His only other allusion to Mr. Macfarlane's demands was to say B.C. had a suggestion about tariff policies relating to the U.S. "although we know we can't implement it because this is a federal matter."

Garrison said because the States-Item ran a story about the use of \$3,000 in public funds for the investigation, his office would have to borrow money to keep it going. He has borrowed money before for an investigation, when the judges of the criminal district court stopped him from using public funds to probe vice in the French Quarter.

## NO CHANGE

### Canada Chair Stays Empty At OAS

OTTAWA (UPI) — Canada is not prepared to join the Organization of American States immediately, even though other Commonwealth countries in the hemisphere are doing so.

New Democratic Party leader T. C. Douglas asked Monday whether Canada would act in unison with Trinidad-Tobago and Barbados.

Prime Minister Pearson indicated in the House that Canada had no intention of joining within the next month or two.

Douglas asked what the government's position was in view of the prime minister's statement "that Canada is prepared to act in unison with the Caribbean nations in making application for admission to the OAS."

Pearson replied that he had expressed the hope that it would be possible for Canada to apply with the other Commonwealth governments in the hemisphere.

### NEXT MONTH

The prime minister said "it looks as if my hope will not be realized" if Trinidad-Tobago's application is accepted and Barbados followed up with an application "within the next month or two."

Both Pearson and External Affairs Minister Paul Martin have expressed the belief that Canada eventually may join.

### MEMBERSHIP

But the Canadian government is concerned about how membership in the OAS and its resulting closer participation in Latin American affairs would affect relations with the United States.

And in recent years, each time the active consideration stage has gathered intensity, crisis such as that in Cuba and the Dominican Republic have made Canadian officials take a second look and have resulted in a cooling-off period.

### EMERALD MINE CAVE-IN

BOGOTA (AP) — A cave-in at the largest emerald mine in the world killed 10 persons on Monday. Two of the dead were army officers who were part of a patrol to guard the government-owned mine in Boyacá against sneak diggers. Five persons were rescued.

"It is high time that this government started to talk Canadian, act Canadian and be Canadian and they should stop pointing at their lapels, with pseudo pride, and start pressing for greater unity in Canada."

He posed two questions which he said should be answered by Mr. Loffmark who was to follow him as final speaker of the day.

"Is the government of B.C. intending that it should treat with foreign states?

"Is the government of B.C. intending to enter into American-dominated economic union with the United States?"

Mr. Loffmark, in his speech, quoted a saying that "patriotism is the last refuge of a scoundrel."

His only other allusion to Mr. Macfarlane's demands was to say B.C. had a suggestion about tariff policies relating to the U.S. "although we know we can't implement it because this is a federal matter."
